

will provide viewers a picture that is 16 times better than regular television.

The Information and Broadcasting Ministry has asked for the Cabinet's approval for studios in four metros to broadcast the games on HDTV, already adopted by BBC and Sky Sports.

However, to get HDTV broadcast, the end user's TV should be HD-enabled. For that you can buy an HD-compatible TV or a set-to box to make your existing TV HD-compatible.

Delhi to get its SEZ

The Delhi government plans to establish a special economic zone (SEZ) in the capital. The government has also identified sectors for the setting up of SEZs, which include electronic hardware and software, information technology-enabled services (ITeS), nanotechnology and biotechnology amongst others. No polluting industries will be allowed to set up inside SEZs, and environmental clearance is a must for all projects except those dealing with ITeS.

The proposed SEZ should also conform to the land use pattern prescribed in the overall Master Plan Delhi 2021, and only those proposals where the applicants already have adequate land as prescribed under the SEZ Act will be considered by the government.

Videocon forays into power backup business

Consumer durable major Videocon has entered the power backup equipment space with the launch of a range of devices. With this new venture, the company aims to reach a revenue of Rs 5 billion by next year and further it to Rs 10 billion by 2011.

The products will be available in three variants (600VA, 800VA and 1400VA), in the price range of Rs 4990 to Rs 11,990. The company has also introduced batteries in the market.

Samsung to launch nine digicams

Samsung India is betting big on the digital camera market and plans to launch nine new models in the first half of 2009.

"This year, we expect the 7- and 8-megapixel resolution cameras to continue to dominate the market. We also expect to see the introduction of full high-definition digital cameras in the Indian market," shared R. Zutshi, deputy managing director, Samsung India.

Samsung closed 2008 with a market share of around 11 per cent in the digital still camera market. It is now looking at doubling its volumes this year based on the introduction of nine new digital still camera models in the first half of this year.

ViewSonic remodeling its distribution plans

ViewSonic has announced its expansion plan for India for the year 2009. The company is planning to introduce in India its high-end products such as all-in-one PCs and netbooks. To unveil these products, ViewSonic is remodeling its distribution plans for India.

Alan Chang, managing director of ViewSonic International, said, "Our focus now is to scale up the Indian operations by launching unique concept product lines suited specifically to the Indian environment of operation that not only provide innovative solutions to the customers but also set a benchmark for the industry to follow."

In addition, the company would be launching a demo drive through its key channel partners in the metro cities. This would be later followed by a country-wide aggressive marketing initiative to educate the customers on the benefits of these concept products.

Dixon to set up LCD TV unit

Dixon Technologies, the owner of the consumer durable brand Weston, will set up a manufacturing unit for LCD TV sets at Oragadam in Tamil Nadu.

According to Dixon's managing director Sunil Vachini, "The 200,000 units per annum plant will service the Southern markets, while the company's other LCD TV plant at Uttarakhand (having annual capacity of 100,000 units) will serve the remaining markets."

Once operational, the plant will

start making the 48.3cm (19-inch) LCD TVs, which will be sold at Rs 10,000.

Philips Electronics India moves to new office

Philips Electronics India has moved to its new office in Gurgaon. Based on the concept of work place innovation (WPI), the new workplace is part of the company's approach to integrate business processes and leverage scale and synergies across organisation. Previously, Philips had its offices spread across Pune, New Delhi and Mumbai. Working from one office, at one location, will offer employees an opportunity to communicate and interact across divisional and functional boundaries.

According to Gerard Kleisterlee, president and CEO, Royal Philips Electronics, "The new Philips India office will be a trendsetter in work space design and ways of working, supporting teams in their commitment to scale up Philips' presence in India."

Moser Baer to install rooftop solar PV in Surat

Moser Baer Photovoltaic (MBPV) has won a contract from roads and buildings department of Gujarat to set up what the company calls one of India's largest rooftop solar photovoltaic (SPV) installations in Surat. The SPV system, of approximately 135 kilowatt-peak (kWp) installed capacity, will run a 40kW load for ten hours every day and charge a battery bank of 6000 ampere hours.

Work on the project has already started, and the complete system will be commissioned by April 2009. MBPV will also manage the operations and maintenance of this site for seven years.

RCom adds five million new subscribers

Reliance Communications has added five million new wireless subscribers on its network during January 2009. With this achievement, the company claims to have become India's first and world's first (apart from China) to add five million new subscribers in a span of 30 days, on its fully-IP enabled, next-
