

lar NXP 2148 ARM micro-controller and has 512 kB of Flash memory, 32 kB of RAM, ADC, DAC, I²C, JTAG and USB 2.0 interface. The kit is supplied with a 16x2 backlit LCD, 24-key keyboard and virtual COM port drivers.

This kit is ideal for development of ARM-based projects since all the port lines are terminated for external use. Sample 'C' codes are given in the detailed technical/operations manual.

Remote telemetry unit

GE Fanuc Intelligent Platforms has announced the QuickPanel remote telemetry unit that enables water/wastewater companies to monitor, diagnose

and maintain water assets and processes through flexible communication architectures.

The RTU can integrate with existing PLC hardware locally and other RTUs throughout the system—seamlessly delivering connectivity across operations.

Automatic voltage controllers

The basic purpose of Jindal's automatic voltage controllers (AVCs) is to maintain the desired voltage and reduce the breakdown of electrical equipment due to low/high voltage. Power saving, reduction in MDI and improvement of PF are added advantages at high voltage. Its servo stabilisers are available in a wide range and various models.

The standard three-phase models are suitable for balanced and unbalanced supply and loads.

Linear regulators with rolling contact have power consumption below 0.5 to 1.5 per cent depending upon the input voltage range. These are suitable for 100 per cent duty cycle and their life at full load is more than 15 years. Dimmer regulators with carbon brush have power consumption above 2 to 7 per cent depending upon the input voltage range. These are suitable for less than 50 per cent duty cycle and their life at full load is less than three years.

MISCELLANEOUS

LED light bar

GlacialLight has launched an innovative LED lighting product that is ideal for replacing current compact fluorescent light bulbs (CFLs) or incandescent lights in all kinds of on-display lighting applications. This light bar extends from cove lighting and low-intensity bookshelf lighting to something

brighter and more appealing—ideal for attracting eyes to a display in a showcase. The LEDs are dimmable without the risk of breakage. The built-in LED driver allows for a stable and uniform light output.

These LED light bars are available in lengths of 30, 60, 90 and 120 cm.
