Economic recovery by year-end?

According to a survey conducted by IDC India, economic slowdown will end by October-December 2009. The CIOs of various companies also revealed that their focus was shifting to better management of existing IT infrastructure by consolidating, optimising and leveraging resources, from building new capacities.

About 66 per cent of the CIOs felt that the slowdown would end by the fourth quarter (October-December) of 2009. However, in view of the larger macro-economic picture and the lag in terms of IT buying by enterprises, the slowdown is expected to extend and IT spending to revive after the second quarter (April-June) of CY 2010. The study found that enterprises are cutting back on new projects and focusing on the maintenance of existing IT setups. Of the total planned IT expenditure for 2009, enterprises plan to spend 20 per cent on new purchases and reserve the balance for managing the existing setup.

India can lead in solar industry

India can play a leading role in the global photovoltaic (PV) and solar industry, suggests a SEMI India white paper. The paper highlights numerous drivers for PVs in India, including the country's rising energy needs, persistent energy deficit situation and over-dependence on fossil fuels for energy generation.

India is already home to nine photovoltaic cell manufacturers and nearly 20 module manufacturers, and benefits from an abundant endowment of solar radiation, averaging 300 sunny days per year. Effective public policies in support of PV manufacturing and wider adoption could sub-

Behl to head Big TV

Sanjay Behl, group head, brand and marketing operations, Reliance Communications, has been promoted to the position of CEO for the company's DTH and IPTV businesses operating under Big TV brand name. He will also continue to hold his current responsibilities where he was a key marketing resource for Reliance ADAG, overseeing corporate architecture.

Huawei appoints COO

Huawei Technologies India Pvt Ltd (HTIPL), Huawei's largest R&D facility outside of China, has appointed Justin Chen as its new chief operating officer (COO). He succeeds George

stantially reduce India's dependence on fossil fuels for power generation, and produce enormous socio-economic benefits.

ELCINA justifies dumping duty on CPTs

The Electronic Industries Association of India (ELCINA) has hailed the Indian government's decision to impose a special duty on colour picture tubes (CPTs) imported from Indonesia. CPTs constitute a major part of the value of a television. This move follows imposition of dumping duty on CPTs from China and South Korea.

The decision comes in the wake of authenticated data provided by local manufacturers. CPT is a highly capital-intensive product and Indian companies have invested huge amounts to establish large capacities. It is

Huang, who has returned to the parent company to take up new responsibilities in the consumer service product line, after a stint of over three years in HTIPL.

Prior to his appointment, Justin held the position of director, message and application department, Huawei Software Company in Shenzhen.

Bhasin is Nasscom chairman

The National Association of Software and services Companies (Nasscom) has appointed Pramod Bhasin as chairman of its executive council for 2009-10. Bhasin, who is president and CEO of Genpact, was earlier Nasscom's vice-chairman.

ironical that out of the well established four manufacturers in the country, two (BPL and Hotline) were forced to close shop a few years ago, because of unfettered imports from China, South Korea and Indonesia at prices below the raw material cost of CPT.
