

CAL-10 Multifunction Process Calibrator

Calibrate your electrical and electronic instruments to establish and maintain traceability and to meet accuracy standards.

CAL-10 allows you to test and calibrate your own equipment and processes for various parameters like DC voltage, DC current and Frequency.

This handy, powerful, yet easy to use calibrator can be used anywhere in your laboratory or on the field.

FEATURES

- ▶ High Accuracy of 0.02% for measure and source
- ▶ 5 digits display for measure and 6 digits display for source
- ▶ Dual display with white light backlit
- ▶ Measures DCV, DCA, frequency
- ▶ Test continuity
- ▶ Range selection mode manual

Falcon T&M product range includes Multimeters, Function Generators, Analog Oscilloscopes, Digital Oscilloscopes, Mixed Signal Oscilloscopes, Spectrum Analyzer and Power Supplies.

Falcon also manufactures educational trainer kits for Data Communication, Network Laboratory, Fiber Optics, Digital Communication, Analog Communication, Telephony and Antenna, Radar & Satellite Communication.

Dealers and distributors are welcome.
Required experienced people for handling sales & service
of test and measuring instruments.
