

Looking For hands-on learning experience

To Become A Successful
electronics engineer

If so, Join one of EFY's training
programmes to hone your skills...

EFY, the publishers of Electronics For You, South Asia's largest selling electronics magazine, now offers various 'Hands-on' technology training programmes that enhance your employability in the industry and even helps you become an entrepreneur in due course. The training is available on the following subjects at present in Delhi and Bangalore:

Basics of Electronics

Duration : 5 days (30 hours); **Schedule:** 18-22 May Bangalore, 25-30 June New Delhi

COURSE DESCRIPTION:

Electronic hardware; building blocks of electronics circuits; soldering and fault finding techniques. Project work: A mini project to be constructed by you which will be yours on course completion
BECOME A CONFIDENT HARDWARE ENGINEER

Robotics

Duration: 10 days (60 hours); **Schedule:** 29 Jun-09Jul 09, New Delhi

COURSE DESCRIPTION:

Science and engineering of robotics; electronic and mechanical hardware related to robotics; basics of PIC16F877A applications used in robotics. Project work: Construction of a robot based on PIC16F877A MCU TAKE HOME YOUR OWN ROBOT AFTER COMPLETION OF THE COURSE

PCB Design

Duration: 5 Days (30 hours); **Schedule:** 11-15 May; & 8-12 June New Delhi 23-27 May Bangalore

COURSE DESCRIPTION:

Basics of PCB designing, schematic drawings, routing, editing, design verification, hands-on practice in making a PCB for a circuit with microcontroller, ICs, active/passive components & connectors.

Renesas R8C Microcontroller

Duration: 10 days; **Schedule:** 27July-6 August & 24 Aug-3 Sept

COURSE DESCRIPTION:

Architecture of R8C microcontroller; Assembly language programming for integration of peripherals; Hands-on training on use of Renesas Starter Kit - starter kit board, E8 emulator and application board in HEW environment. HEW integrates various tools such as compiler, assembler, debugger and editor into a common graphical user interface. Learn to evaluate Renesas microcontroller performance for your product application.

*This Course is approved by Renesas Technologies under an MOU with EFY**

Microcontroller: Microchip PIC16F877A

Duration: 10 days (60 hours); **Schedule:** 18-27 May Bangalore, 01-11 June & 10-20 Aug New Delhi

COURSE DESCRIPTION:

Comprehensive study of the device, Assembly language programming. Hands-on training on use of MPLABIDE for compilation, simulation, debugging and programming for interfacing of analog and digital peripherals GET A CERTIFICATE FROM MICROCHIP TECHNOLOGY INC, USA

Embedded Systems

Schedule: 15 June-8 August, New Delhi

Module I: Duration: 12 Days (72 Hours)

Overview of Embedded system, PIC18F4520 Microcontroller

Module II: Duration: 12 Days (72 Hours)

ATMEL Microcontroller

Module III: Duration: 12 Days (72 Hours)

Programming in C and Embedded C

Module IV: Duration: 12 days (72 Hours)

RTOS, Special Networking Protocols
