TOUCH-SCREEN
PDA PHONES

**GIGABYTE'S GSmart PDA PHONES
COME WITH A SMART TOUCH USER
INTERFACE AND GPS TRACKING**

For basic computing on the move, a personal digital assistant (PDA) is a good option. Gigabyte has launched three models of GSmart—its touch-screen PDA range.

The MS820 claims to be the ultimate PDA mobile phone for business users. This 3.5G high-speed phone has a 5-megapixel camera with auto focus, face detection and video mode. Its smart sensor provides vertical or horizontal screen display and allows you to experience motion-sensitive mobile games.

The MS820 includes Windows Mobile Direct Push email, SMS, MMS, Window Live Messenger and WiFi, Bluetooth, WAP and USB connectivity. It can work virtually with all audio, video and image formats.

The smart touch interface allows easy management of the main menu, while multimedia features include a photo editor, music player and FM radio. GPS (global positioning system) tracking enables you to download online maps and tag photographs to a location.

The other two GSmart models, MW702 and MW700, are at the entry-level price range and feature Windows Mobile Professional operating system, smart touch user interface, GPS tracking, Wi-Fi, Bluetooth, WAP, USB connectivity, radio and recorder.

'SIZE ZERO' NOTEBOOK

THE HP PAVILION DV2 NOTEBOOK IS JUST UNDER 2.5CM (1-INCH) THIN

Bulky and fat notebooks make frequent flyers weary. Hewlett Packard (HP) has launched the Pavilion dv2 notebook in India. Advertised as a 'size zero' notebook, it is just under 2.5cm (1-inch) thin and weighs 1.64 kg.

The compact dv2 notebook is equipped with an energy-efficient AMD Athlon Neo processor, ATI Radeon X1250 integrated graphics and optional ATI Mobility Radeon HD 3410 discrete graphics. It is complemented by a 30.7cm (12.1-inch) backlit widescreen display.

The dv2 also offers an external Blu-Ray optical drive, Windows Vista and

(plus taxes)**

a variety of high-capacity hard drive options up to 500 GB.

POCKET PROJECTOR

ACER'S K10 PICO PROJECTOR WEIGHS JUST 550 gm

Presentations are a part of most executives' life, for which projectors are required. But it is cumbersome to travel with a heavy projector. Now, Acer has launched its K10 pico projector in India. Weighing just 550 gm and measuring 12.7×12.2×4.8 cm³, it is one of the smallest and lightest projectors in the market today.

While all Acer projectors are based on digital light processing (DLP)—a technology that offers enhanced contrast, sharpness and image vividness—the K10 pico projector combines DLP technology with a LED lamp technology, taking picture quality to a new level. According to the company, the tiny projector provides 100 ANSI

Lumens for clear and detailed images of sizes up to 152 cm (diagonally), while a contrast ratio of 2000:1 ensures clear, vibrant projections.

The device comes with a two-year carry-in warranty for the projector and a 90-day warranty on the lamp.
