## LED power driver

GlacialTech has launched LS10P/35P series light emitting diode (LED) drivers. The LS10P/35P series is specifically designed to work in conjunction with LED tubes, lightbars and regulates the voltage and power consumption in the most economical way.

The benefits of the LS10P/35P series include the ability to dim the LEDs. Many LEDs available in the market will not work after you have dimmed them but GlacialPower ensures that the LED will continue to function even after you have dimmed the lights.

The driver is extremely safe, has a thorough burn-in test and a 1-year warrantee. The power correction factor (PCF) of the power driver is highly specialised and maintains a clean and pure voltage/current ratio to prevent disruption to power which in turn prevents the LED from deteriorating over time. This added feature enhances the life of the LEDs and ensures lower power consumption.

## Welding thyristor module

SunRex has introduced a wide range of PWB (printed wiring board) series three-phase, non-isolated welding thyristor module (half bridge) with mount-

ing base as joint anode terminals. It is available in 60A, 80A, 100A, 130A and 200A with a capability to block peak inverse voltage up to 1600V.

These welding thyristor modules are widely used in welding machines.

SunRex Welding Thyristor Module reforms well in short-circuit current protection CR absorber, mounting and safe operation area.

## Metering analog front end

Microchip Technology has launched its Analog Front End (AFE) for metering applications. The MCP3901 AFE features high-accuracy, dual 16-/24-bit Delta-Sigma Analogue-to-Digital Converters (ADCs) with up to 91dB signal to noise and distortion (SINAD).

internal programable gain amplifiers (PGAs) and voltage reference, phase-delay compensation and a modulator output block, enabling more precise measurements.

With high-speed sample rates up to 64 kilosamples per second (ksps) and SPI interface, the MCP3901 AFE is ideal for a variety of single- and multi-phase metering, industrial and medical applications.

## STORAGE

### Portable hard drive

Strontium has launched an external hard drive—Strontium Power Store Slim. This portable hard drive features

DigiPower  
**OKAYA**<sup>®</sup>

Sealed Maintenance Free VRLA Battery

The Power to Perform

## Sealed Maintenance Free VRLA Batteries

RANGE : 7.2Ah to 200Ah

## Break Free Life

A clutch of design features ensures that OKAYA SMF / VRLA batteries perform predictably and reliably every time.

- High Power Density
- Excellent Recovery From Deep Discharge
- Reliable Construction
- Maintenance Free Operation
- Higher Reliability & Quality

### OKAYA POWER LTD.
