'Sustainable energy crucial for survival of planet'

While inaugurating the International Conference on Research Policy for Sustainable Energy, organised by the Indian National Academy of Engineering (INAE), Dr R. Chidambaram, principal scientific advisor to the government of India, emphasised that sustainable energy is crucial for the survival of the planet due to emission and climate change concerns.

Suitable energy technologies that suit Indian conditions should be developed. Research policies should be evolved to facilitate development and deployment of such technologies, he added.

Chidambaram listed several topics such as solar energy, clean coal technologies, smart and micro grid, renewable energy, energy efficiency, hybrid vehicles, etc to be pursued on a national level.

Power chip market to recover in 2010

After declining by 14 per cent in 2009, the global market for power management and driver ICs will recover strongly in 2010, according to IMS Research. It will then average around 10 per cent growth each year over the next five years.

The fastest growing markets are predicted to be those for PoE ICs, integrated power stages and power factor correction (PFC) ICs.

Ryan Sanderson, market analyst, IMS Research's power and energy group said, "2009 has been a tough year for many semiconductor manufacturers, particularly during the first half; though the power IC market has been a little more resilient than most. Indeed, the markets for PoE and PFC controllers are even forecast to grow in 2009, which is impressive given the

Sushil Bandi is now country manager of WD India

Storage company Western Digital (WD) has appointed Sushil Bandi as country manager for the Indian subcontinent. Reporting to Sharad Srivastava, director sales, India and South Asia, Bandi will be responsible for spearheading the overall WD sales, marketing and customer support functions for the subcontinent.

Rick Simonson to head Nokia's mobile phones business

Rick Simonson has been appointed to head Nokia's mobile phones entity within the devices unit. He will also head strategic sourcing for/of the unit. He will continue to be a member of the group executive board.

Kiran Karnik joins Sasken Board

Sasken Communication Technologies has announced the co-optation of Kiran

current economic climate."

Sanderson added, "Strong revenue growth for nearly all product types is projected from 2010 to 2013, driven largely by a continuing need for equipment to be more energy-efficient. This often requires a more complex, and therefore more expensive, power management solution. Integrating more power-hungry functions, particularly in portable equipment which need to offer longer battery life, will also help the market for power ICs, particularly battery-management ICs.

PC industry performs better than expected

The PC industry performed better than expected as worldwide PC shipments totaled 80.9 million units in the third quarter of 2009, a 0.5 per cent increase from the third quarter of 2008, according to a study released by Gartner, Inc.

According to the study, the third

Karnik on its board of directors as additional director.

Karnik held the office of president of NASSCOM till January 2008.

Polycom appoints Neeraj Gill as MD in India

Polycom has appointed Neeraj Gill as managing director of its India and SAARC operations. Gill will be responsible for guiding Polycom's business strategy in these territories and extending the company's share in key markets, particularly the fast-growing video-conferencing market.

Nair takes over as IAA president

Dr G. Madhavan Nair, chairman, Indian Space Research Organisation (ISRO) has taken over as the president of the International Academy of Astronautics (IAA). Nair was the vice-president of scientific activities of the IAA during the last four years.

quarter shipments grew by 18 per cent which is higher than the historical seasonal growth from the second to third quarter.

The consumer market continued to lead unit shipment growth, driven by low priced mobile PCs. Ongoing price declines continue to be a major issue in the PC industry.

Hewlett-Packard continued to lead the worldwide PC market as its shipment growth exceeded the worldwide average.

India ranks 44th in IT Competitiveness Index

India ranks 44th in the world in the IT industry competitiveness index, moving four notches up from its 2008 ranking of 48 in the index. India has an overall score of 34.1 on the IT competitiveness index, according to the findings of a new study issued by the Economist Intelligence Unit (EIU) and sponsored by the Business Software
