

Alliance (BSA). The study assesses and compares the IT industry environments of 66 economies, to determine the extent to which they enable IT sector competitiveness.

Category wise, India has shown improvement in its R&D environment, moving from a score of 0.6 last year to 22.0 this year. It has also shown strong performance in the business environment and encouraging improvements in the legal environment. India still continues to have the advantage of human capital. However, fluctuating performance in IT infrastructure needs improvement.

IEEMA wants duty on Chinese power equipment

IEEMA, an apex body of the Indian power equipment industry, has welcomed the recommendations proposed by the ministry of heavy industries to the finance ministry to impose duty on import of Chinese power equipment.

Murali Venkatraman, president, IEEMA welcomes the ministry's stand on imposing safeguards duty on imported Chinese power equipment.

IEEMA asserts that it has always welcomed competition from all quarters provided there is no unfair advantage enjoyed in terms of inputs, taxes and duties and hidden subsidies, particularly extended to Chinese manufacturers.

Keeping in view the expansion of the power sector by the government of India, Indian power equipment manufacturers have been significantly expanding their capacities, particularly in the transmission and distribution domain.

HCL Info wins Rs 5000-million RAPDRP contract

HCL Infosystems has bagged an IT contract worth over Rs 5000 million for Rajasthan's power distribution utilities. The contract is for the implementation of a statewide solution involving integration of IT GIS AMR and the associated technologies. The state is also the first in India to facilitate implementation of power reforms by the

Ramakrishnan wins Nobel Prize for chemistry

US Scientist Dr Venkatraman Ramakrishnan has won the Nobel Prize for chemistry and made his state Tamil Nadu proud. He is the third scientist from the state to win the Nobel Prize after C.V. Raman in 1930 and Dr S. Chandrasekhar in 1983.

Dr Ramakrishnan has been awarded for his work on protein-producing ribosomes and its translation of DNA information into life. He will share the prize with Dr Thomas E. Steitz

of Yale University, Connecticut and Dr Ada Yonath of Weizmann Institute of Science in Israel.

HCL Technologies wins Golden Peacock Innovation Award

HCL Technologies has been conferred with the 'Golden Peacock Innovation' Award for its MTaaS (a business service management centric service delivery platform) offering in the IT Sector category.

HCL's MTaaS offering was chosen amongst more than 188 corporate entries for the award.

ministry of power under Restructured Accelerated Power Development and Reform Program (RAPDRP).

The project involves consultancy, design, development and implementation encompassing business process applications like CRM and billing and technologies like GIS and AMR.

The project also involves setting up of a wide area network and data centre with a disaster recovery backup centre. The project will also implement a statewide differential GPS to map all the electrical assets of the three distribution companies of the state.

HP India celebrates LaserJet silver jubilee

HP India is celebrating the 25th anniversary of its LaserJet printing solutions. The LaserJet printers have had phenomenal success in the Indian market owing to constant technological innovations, channel trust and customer satisfaction. The company also announced various 'green' solutions to minimise the environmental impact with features such as carbon footprint calculator, instant-on technology and duplex printing.
