

"If only there was a high-power sensor to meet all my testing needs."

There is. In fact, there are five.

Agilent has just widened your options with 5 new high-power USB sensors, providing greater flexibility to meet your testing needs. This now gives you power up to +44 dBm over a wide frequency range, making it an ideal power measurement solution for basestation testing and maintenance, as well as WiMAX™ and WLAN components manufacturing. You'll also benefit from the

Direct USB connectivity to your PC
and these Agilent instruments for
average power measurements:

*Performance Network Analyzers
(PNA, PNA-L, PNA-X Series)*

*Handheld Spectrum Analyzers
(N9340A/B)*

Greater flexibility with Agilent U2000:

*Frequency range: 9 kHz to 24 GHz
Power range: -60 dBm to +44 dBm*

built-in triggering for synching with external instruments and performing accurate time-gated measurements. Plus the internal zeroing capability prevents sensor wear-and-tear while reducing testing time, delivering your results more accurately and faster than ever before.
