3G ENABLED EASY-TO-USE SMARTPHONE

LG's GM730 COMES EQUIPPED WITH 3D S-CLASS USER INTERFACE, AND IS COMPATIBLE WITH WINDOWS

LG India has launched a smartphone—GM730—in collaboration with Qualcomm. Based on Qualcomm's MSM 7201A chipset, GM730 has 3D S-Class user interface, 3G features, and is compatible with Windows.

Features & USP. The smartphone is designed for fast and easy operations—email, for example, is easier to set up and use because the phone's schedule and contact lists are inter-linked. This means users can send and receive messages with less key presses than on regular cellphones, making the process of sending an email smoother than ever.

The smartphone is highly functional and the integrated S-Class user interface

enables finger-friendly touch operation, where its usability is enhanced by dynamic 3D graphics, large font and short-cut icons. With a thickness of 11.9 mm, GM730 is designed with a rounded edge profile to maintain the sleek and slim look.

Advanced multimedia features such as a 5 megapixel camera, MP3 player and numerous action-packed games make this phone a full-featured entertainment device. Networking on the Map Service, a navigation-based social networking service, enables users to see where their friends are while communicating in real time. GM730 also comes equipped with a GPS for easy navigation through unknown areas.

EFFICIENT AND USER-FRIENDLY CAMERA

Price: Rs 7999

BenQ's C1030 ECO HAS SMILE CATCH, AUTO-FACE TRACKING, BLINK DETECTOR, AUTO-SCENE MODE AND LOVE PORTRAIT

Features and USP. The digital camera has high ISO up to 6400, 3x optical zoom and 6.8cm LCD screen. Sleek and compact with Li-ion battery, the camera is available in multi-colours. Exceptional efficiency and user-friendliness are made possible by the highly intuitive photo-taking and photo-editing functions of this camera. A comprehensive selection of options like smile catch, auto-face tracking, blink detector, auto-scene mode and love portrait make this camera a fun companion.

The camera's auto-scene mode can

automatically detect the best mode out of eight different modes like landscape, portrait, back light, back-light portrait, night scene, night portrait, macro and sunset. All you have to do is press the shutter and the auto-scene mode will do the rest for you. With 5cm macro, the camera automatically scans and switches to the macro mode when you are taking close-ups of flowers or small objects. The love-portrait mode detects at least two faces. The blink detector can alert you when a subject has blinked, allowing the shot to be retaken immediately or saved according to your preference.

BenQ has launched its digital camera C1030 Eco in the Indian market. The sleek and slim camera comes in 10-megapixel and 12-megapixel.
