

Embedded Starter Kit

Embedded ARM Starter Kit

Rs. 6,985/-

With Philips LPC2129 μ C, 2 UART, 2 CAN Ports, 4-ch 10-bit ADC, JTAG debugger, Example codes and Case Studies

ARM9 Starter kit with touchscreen

Rs. 8,985/-

Samsung S3C2440A, 64MByte SDRAM, 64MByte Flash, Nano 2MByte Nor Flash, 12MHz Crystal, 3.5" LCD Complete source code for boot loader and application programs

PIC Starter Kit

Rs. 4,985/-

With PIC16F877A μ C, LCD, 7-Seg Display, UART, 2IF sockets for 4028/18 pin 16F and 18F series, Example codes and Case Studies

VLSI Starter Kit

Rs. 8,895/-

100,000 gate Spartan 3E FPGA, VGA, UART, Ethernet Port, JTAG Dongle, Example Codes and Case Studies

ARM 11 ANDROID

This full-featured ARM 11 Android Development Kit with Samsung S3C6410, ARM1176 J2F-S core, is new killer in market place, Ready configured Android root file system gives you a kick-start into the application software development

Software Driver:

1. Mobile DDR driver
2. NAND flash driver
3. LCD driver
4. Touch screen driver
5. SD/MMC driver
6. Audio driver
7. Ethernet driver
8. UART driver
9. RTC driver
10. Keypad driver
11. SPI driver
12. USB driver
13. CMM driver
14. G2D driver
15. JPEG driver
16. MFC driver
17. PP driver
18. ROTATOR driver
19. TVOUT driver

Application programs:

1. Alarm Clock
2. ASTRO
3. Browser
4. Calculator
5. Camera Pro
6. Contacts
7. Dialer
8. Email
9. Gallery
10. GlobalTime
11. MSN
12. IM
13. Mediaplayer
14. Meridian, Compass
15. Messaging
16. Metal Detector
17. Mobile navigator
18. NBA 2 GO
19. Note pad
20. Panda Reader
21. PicSay
22. Ringdroid
23. Setting
24. Music, Sound Recorder
25. Spare Parts
26. Ultimate Stopwatch
27. Video Player, Voice Dialer

RTOS Learners Kit

Rs. 5,985/-

89V51RD2 based kit with Avx-51 RTOS, supports both Round Robin and Priority Based scheduling, Inter-task communication etc. Ideal for understanding RTOS concepts.

RFID-ARM Project Kit

Rs. 9,960/-

Ideal for Office / Home Automation, LPC2129 based SBC with integrated RFID module, 10 nos of RFID Tags, Example codes

RFID 8051 Project Board

Rs. 7,960/-

89V51RD2 μ C with 8-Ch ADC, UART, RTC, LCD, External 1K EPROM, 32K RAM, Add-on card with RFID Module, 10 nos. of tags, Example Codes and Case Studies

Low Cost ARM Project Board

Rs. 2,000/-

With Philips LPC2129 μ C, 2 UART, JTAG Debugger, Prototyping area, Port pin Extensions, Example codes and Case Studies

* Conditions Apply

ONLINE / DISTANCE - CERTIFICATION COURSES (Emblitz Varsity Associate Trainee program)

Embedded Systems Design

Rs. 8,760/-

Fully interactive self study course to learn embedded system design from scratch; Kit includes an 8051-based evaluation board, Video tutorial CDs, Software and Documentation.

VLSI Verilog Kit

Rs. 13,780/-

Fully interactive self study course to learn VLSI design using Verilog from scratch; Kit includes the VLSI Starter Kit with Video tutorials, Software and Documentation.

Embedded Linux

Rs. 19,500/-

Fully interactive self study course to learn Embedded Linux from scratch; Kit includes the ARM + based Linux Learner's Kit with Video tutorials, Software and Documentation.

ARM

Rs. 6,800/-

Fully interactive self study course to learn ARM architecture, programming and applications from scratch; Kit includes an LPC2129-based project board, Video tutorial CDs, Software and Documentation with examples

Real Time Operating System

AVX is a cost-effective solution to any embedded system requiring a Hard Real Time performance. AVX designed as a low-cost solution for RTOS in small and medium-scale embedded applications. AVX is fast, efficient, deterministic and complete, with a small footprint, and supports ARM7, ARM9, x86, AVR32, Coldfire and PIC32 architectures. VxWorks and POSIX-compliant API's enable migration from VxWorks and legacy RTOSs. An Eclipse-based IDE is provided for simulation and OCD debugging thereby reducing time to make and helping to make applications bug-free.

Corporate Training

We provide training programs to institutions and corporate organizations, with special emphasis on hands-on sessions and are delivered by experts with R&D background. Courses are conducted in microcontroller programming (8-bit to 32-bit), ARM, VxWorks, Linux, Board Support Package, Device Drivers, etc., and are supplemented with case studies and skills development workshops.

We also conduct 100% Job Oriented 4.5 Months Diploma course on Embedded System Design

Design and Development Services

With our high-level expertise in cutting edge technologies including Embedded Software Development, Real-time systems, PLC based Factory and Building Automation, RFID solutions, etc., we offer product design and development services and technical consultancy to companies who are interested to out-source whole or a portion of their design jobs. We have developed several Embedded applications for use in areas such as Info and Building Automation. Write to us at info@emblitz.com for your requirements.

Ordering Information:

- Send M/O/ DD/Cheque for the order amount payable at Bangalore, in favour of M/s. Everest Infocom Pvt. Ltd.
- Online Funds Transfer to our Bank A/c No. 065010200011811 of AXIS Bank, Basavewarwanagar, Bangalore-560079
- Pay online using VISA/MASTERCARD at www.emblitz.com/catalog

Terms and conditions:

- The kit prices mentioned are inclusive of all taxes and Govt. levies.
- Within India shipping is done through courier free of cost.
- Foreign Customers are requested to visit our website for pricing and for other terms and conditions.
- Normal Delivery within 7 working days from the date of order confirmation.
- Warranty and Technical Support for all kits is provided; conditions apply.
- The kit specifications and prices are subject to change without any prior notice given.
- For more details on terms & conditions visit our website www.emblitz.com.
- All disputes are subject to Bangalore jurisdiction.
