

Amit Trivedi of Jilin Sino Microelectronics. Adding on, Jane, sales representative, Connfly Electronic, says, "The Indian market is very crucial for us as around 40 per cent of our business comes from here. Electronica India 2009 helped us reach out to the Indian market in a more focused way."

Domestic players upbeat

electronica India 2009 also saw a large number of domestic players, especially from the SMT, EMS and test and measurement sectors. "electronica India 2009 is the only platform that our industry has for showcasing its might. It is an enabling platform for both suppliers and customers," says Amit Madan, country manager, TransTechnology India. Talking on similar lines, MS Manjunath, SM Electronics Technologies, says, "electronica India 2009 gave us a good platform and opportunity to showcase our products."

However, despite the cheer among local players, there was also a slight gloom among exhibitors about the absence of some major players from the electronics industry. "We were slightly disappointed with electronica India 2009. However, we shall continue to participate in productronica Germany," says Meghnad Shah, managing director, Frontline Electronics.

"Overall we felt a decline of about 40 per cent in footfall and number of stalls this year at electronica," says Sudesh Rao, managing director, Leo Circuit Boards. Parinda Pai Kane, manager-business development and engineering, Titan Timeproducts (TTPL), says, "electronica India 2009 saw more suppliers than customers come in."

Nevertheless, an equally large number of local exhibitors were calm and satisfied by the end of the fair. "Because of the recession and other factors, we were apprehensive about being able to justify our investment in the show. However, the response has led us to believe that our investment is safe as we have had several enquiries," says KM Swaminathan, senior business manager, NMTronics India. Testifying the same,

eleB2B.com Best 10 Stalls

eleB2B.com, a portal from the EFY Group, the official media partner of electronica and productronica India 2009, had judged the 300 stalls at the event to come up with the '10 Best Stalls,' based on the unbiased opinions of the visitors through a questionnaire circulated at the exhibition on all four days. The stalls were judged on three counts—'Most Impressive Booth,' 'Most Popular Booth' and 'Most Customer-friendly Booth.'

Prosem Technology India emerged as the first among the top 10 stalls. SLN Technologies and Kaynes Technology India shared the second place. NXP Semiconductors India got the fourth place and was followed by Sumitron Exports at the fifth place. The sixth place was shared by Varitronix and Yuntong Power. The eighth position was also shared by Omega Products and Axiom Energy Conversion. At the tenth position was Syratron Marketing.

(L-R) Soni Saran Singh, executive director, NMTronics; Satendra Singh, factory head, Nokia Siemens Network India; Vijay Malhi, senior vice president, Moser Baer India; Mikko Kaukoranta, MD, Salcomp India; Sanjay Narayan, MD, SGS Teknics India at the International Conference on EMS Contract Manufacturing

Subhash Goyal, director, Digital Circuits, says, "The EMS concept is picking up. There were more competent EMS players present that gave confidence to OEMs to outsource."

Conferences

The Asia Federation of Electronic Countries (AFEC) held a two-day seminar on 'World Market and Trends' where representatives from countries like Japan, India, Korea, Hong Kong and Taiwan participated. Besides, two international conferences on the 'Trends and Future Requirements in Automotive Electronics' and 'EMS/Contract Manufacturing' were held.

The International Conference on EMS Contract Manufacturing highlighted how the growing Indian economy is fueling a massive consumer boom resulting in a demand for electronic gadgets, appliances and equipment and companies increasingly

turning to EMS firms to fill the pipeline. The panel discussion had speakers from Nokia Siemens Network India, Moser Baer India, SGS Teknics India, Elcoteq India, Salcomp India, Tesselco, Rangsons Electronics, etc.

The other international conference on the 'Trends and Future Requirements in Automotive Electronics' gave an insight into automotive electronics from an Indian perspective including the technical and socio-economic trends that are intrinsically linked to the world of modern mobility. Industry leaders from NXP Semiconductors India, Wipro Technologies, KPIT Cummins Infosystems, Robert Bosch and Tyco Electronics India were present for the discussion. Delegates from over 100 companies participated in each conference.

Altogether electronica India 2009 was a success with most electronic might present—big or small, domestic or international. ●
