

Hiring now for the low-power future.

Actel, a semiconductor company headquartered in the U.S., is looking for talented engineers and other experienced professionals for its new design center in India.

Actel, the leader in low-power FPGAs and mixed-signal FPGAs, offers the most comprehensive portfolio of system and power management solutions. As the demand for low-power devices increases in markets like consumer, medical, automotive, industrial and aerospace, so does our need for good people. Join us, and help Actel make a difference in the semiconductor industry. Learn more about Actel at actel.com
