

DigiPower OKAYA®

Sealed Maintenance Free VRLA Battery

The Power to Perform

Sealed Maintenance Free VRLA Batteries

RANGE : 7.2Ah to 200Ah

Break Free Life

A clutch of design features ensures that OKAYA SMF / VRLA batteries perform predictably and reliably every time.

- High Power Density
- Excellent Recovery From Deep Discharge
- Reliable Construction
- Maintenance Free Operation
- Higher Reliability & Quality

OKAYA POWER LTD.

smartphone-like abilities to feature phones. OneApp is basically a "do it all" application that enables users to run various subsidiary applications under its umbrella. These include mini Facebook, Windows Live Messenger, Twitter and Mobile Wallet. It is pretty light on the resources, requiring just 150 kB. The add-on apps are just 30 kB in size and hence should fit in most feature phones of today.

The best thing about OneApp is that users can access the service online, which means you do not really store and install the application to your device. OneApp will be initially launched in South Africa.

Nokia's first Linux smartphone

Nokia has now announced its first phone running on Linux software. Built around the company's Linux-based Maemo operating system (Maemo 5), the N900 empowers users to have dozens of application windows open and running simultaneously while taking full advantage of the cellular features, touch screen and QWERTY keyboard.

According to the company, the

Nokia N900 Linux-based smartphone

N900 has evolved from Nokia's previous generation of Internet Tablets. It packs a powerful ARM Cortex-A8 processor, up to 1 GB of application memory and OpenGL ES 2.0 graphics acceleration. The result is PC-like multitasking, allowing many applications to run simultaneously. Switching between applications is simple, as all the running content is constantly available through the dashboard.

The Nokia N900 will be available in select markets from this month.

World's smallest single-chip device

ST-Ericsson claims to have introduced the world's smallest chip for Bluetooth, GPS and FM combination. Named CG2900, the chip is said to offer best-in-class audio quality, high-precision GPS services and improved battery life on mobile phones when using Bluetooth, GPS and FM applications. It is suited for mass-adoption in smartphones, feature phones and high-volume low-end handsets.

Smallest 2.25MHz DC-DC converter

Texas Instruments (TI) claims to have introduced the smallest 2.25MHz DC-DC converter for USB-powered portable applications and wireless modems. The TPS62750 is a 92 per cent power-efficient, synchronous step-down converter that can provide up to 1A input current. It operates off input voltage ranging from 2.9V to 6V, allowing it to support batteries with an extended voltage range and USB-compliant power requirements.

In addition to small size, the TPS62750 offers a high degree of performance and efficiency. Its power saving mode operates at light load currents over the entire load current range. In addition, the converter can discharge during shutdown.

Heat stroke killed Chandrayaan-I

The reasons for early termination of the Chandrayaan-I mission are now
