

TOP 100 ELECTRONICS & IT COMPANIES IN INDIA

"There is no such thing as failure. There are only results."

—Anthony Robbins (American self-help writer and advisor to leaders)

It is again that time of the year when we do a stocktaking of Indian companies from the electronics and IT verticals. This year's survey has led to interesting insights regarding the growth trends in different verticals, strategies that worked well, and those that fell flat!

This year, yet again, the top 10 positions are divided almost equally between the IT and telecom industry.

Bharti Airtel tops the charts, recording significant growth in its revenues, moving up from last year's Rs 270,122 million to Rs 373,521 million this year. With both its revenues and profits dropping steeply, BSNL slips to the second position. Nokia India and Vodafone Essar are two new entrants in the Top 10 list. TCS, Wipro, Infosys, Reliance Communications, HP and Redington continued to be amongst the top 10.

Huawei Technologies India, HBL Power Systems, Educomp Solutions, Microtek International, EMC India, Bartronics India, OnMobile Global, Zicom, R Systems, ZTE Telecom India, Datamatics and XL Telecom & Energy are amongst the new entrants this year.

The companies that significantly climbed up the ranking are Patni Computers Systems, Aricent Technologies, Prithivi, Mindtree, Opto Circuits (India) and Geodesic.

Samsung India's revenue improved significantly, moving up from Rs 52,260 million to Rs 82,586 million.

MTNL fell from 19th to 24th position, and so did its revenue. Bharti Teletech (dropping from 40th to 55th position) and Salora International (slipping from 51st to 70th place) emerged as the other big losers during the financial year 2008-09.

Intel, SAP, Adobe, L&T Infotech, Philips Electronics and Cognizant declined to participate in this survey. Satyam Computers is also out of the reckoning this year.

The Top 100 is compiled using information sourced directly from the companies or their balance sheets published on websites. The consolidated revenue figure for the current financial year has been the key ranking determinant. As gross turnover may not be the ideal reflection of a company's performance, effort has been made to provide profit figures as well.

We solicit suggestions to make this report even better in the coming years.
