NVIDIA ION
GRAPHICS
PROCESSOR

**ACER'S ASPIRE REVO PROMISES
ENJOYMENT OF MULTIMEDIA
CONTENT IN HIGH DEFINITION**

Acer has introduced Aspire Revo in India. Featuring the Nvidia Ion graphics processor, Revo offers advanced graphic capabilities for enjoyment of multimedia content in high definition. Aspire Revo not only offers immediate access to music, videos and images but also transmits

Price: Rs 25,235 (inclusive of taxes)

and streams high-definition (HD) content and can be used as a gaming console.

Features & USP. Characterised by refined design and reduced dimensions, Revo combines the Intel Atom 230 processor with the Nvidia Ion graphics processor. The highly integrated Nvidia Ion's graphic processing unit (GPU) delivers 5-10X faster graphics performance than desktop PCs with integrated graphics. Certified for Windows Vista Premium, Nvidia Ion ensures access to complex video with full graphic support. Thanks to a special mounting system, it's possible to attach this device to any LCD monitor with a VESA attachment to offer users an all-in-one capability.

NETBOOK WITH SUPER HYBRID ENGINE

**THE EEE PC SEASHELL SERIES FROM ASUS MONITORS PROGRAMS IN USE
AND ADJUSTS POWER SUPPLY ACCORDINGLY**

Eee PC 1005HA: Rs 23,560

Eee PC 1101HA: Rs 28,520

PERSONAL 3D PRINTER

**WITH SMALL FOOTPRINT, THE DESKTOP-SIZED UPRINT FROM STRATASYS HAS
AUTOMATED SUPPORT REMOVAL SYSTEM**

DesignTech Systems, the country-wide distributor of Stratasys Inc., has launched uPrint, a personal 3D print-

er from its Dimension series in India. It provides users a networked, desktop-sized 3D printer capable of building durable, accurate models ready for testing. Designed for the desktop, uPrint requires only a 63.5cm×66.04cm footprint and features an 20.32cm×15.24cm×15.24cm build envelope.

Features & USP. uPrint features an automated support removal system, allowing for hands-free removal of the support, saving labour and enhancing ease of use of material. Using Dimension's proven FDM technology, uPrint prints models with Stratasys ABS plus—a material 40 per cent stronger than the company's previous ABS material, making it ideally suited for testing the form, fit and function of models and prototypes.
