Sing with Loop

Loop Mobile, Mumbai's newly rebranded mobile service provider, has launched 'Karaoke messaging' as a value-added service. The service allows subscribers to sing to accurate lyrics of songs, listen to their recordings and then dedicate them to their loved ones. Dialling 54999 will engage you with this entertaining experience. Loop Mobile claims to be the only service provider to launch this trendy service. It comes as an interactive voice response-based portal which hosts over 500 tunes of Bollywood music ranging from retro to romantic songs, to ghazals.

Wi5 wireless broadband service

Zylog Systems India, a leading global software solutions and services provider, has announced the launch of its Wi5 wireless broadband services. This service will enable customers to access high-speed, wireless broadband connectivity through their laptops, desktops or mobile devices by subscribing to Wi5's service. With this launch, Zylog enters the Internet service provider (ISP) business in the country and has obtained a category 'A' ISP licence to operate across India's DoT circles.

Free download of radio application

Geodesic Ltd, a leading provider of mobile and desktop solutions for instant messaging, VoIP and Internet radio, announced that its Munda Radio application is now available for free download in the Nokia Ovi store. While Nokia users have always been able to access Munda Radio through the Web, they now have the convenience of directly downloading from the Ovi store. These stores are an evolving media service that consolidate content services into a one-stop-shop for free and paid content.

UTStarcom launches IP partner programme

UTStarcom has launched its India Internet protocol partner programme focused on R&D to provide a single-window solution to telecom operators for providing better value-added services to subscribers. UTStarcom is working with more than 20 partners to develop these rich applications, which are to be added to its IP-based offerings. The applications in the immediate pipeline include tele-education, gaming, social networking, widgets, advertising, messaging convergence and contextual information.

WIRELESS ALL-IN-ONE PRINTER

HP'S PHOTOSMART C4588 ALLOWS USERS TO START A SCAN OR COPY WITHOUT TURNING ON THE COMPUTER

Hewlett Packard has introduced HPP Photosmart C4588 wireless all-in-one printer. With this easy-to-use offering, one can print everything, from Web pages to smudge-free photos, in just 25 seconds. The C4588 also allows users to start a scan or copy without turning on the computer.

Features & USP. With the HP

Photosmart C4588, you can print and share your printer with one or more PCs/notebooks on an existing wireless network. You can enjoy PC-less high quality photo printing capability by inserting the memory card into the printer. With its one-touch buttons, you can even make photo reprints and professional quality text document copies.

It has a special feature that automatically identifies the type of paper in the tray and optimises print copy quality. It also facilitates affordable printing and fewer cartridge changes with high capacity ink cartridges, which give three times more black and coloured print-edges.

Price: Rs 8,800
