

Portable meters

Meco-V offers moving-iron and moving-coil portable ammeters and voltmeters.

These instruments are housed in phenolic cases and fitted with a knife-edge pointer and mirror scale to give parallax-free readings. The scales are finely graduated.

These portable instruments conform to IS 1248 standards.

Digital multimeters

Rishabh Instruments has come up with a new range of digital multimeters. These multimeters (RISH Multi) come loaded with features like automatic terminal blocking system (ABS), min./max. value storage, indication of

negative values on the analogue scale, root mean square value with distorted waveform, automatic data hold, auto ranging/manual range selection, continuity test, temperature measurement, overload warning, signalling in the case of a blown fuse, power economising circuit and protective holster for rough duty.

The multimeters are automatically calibrated for Fluke 5500/Wavetek 9100. Calibration is done automatically through a calibration software with an RS-232 connection to the multimeter.

TOOLS & EQUIPMENT

Designer distribution boards

Havells India has introduced a designer range of distribution boards—DBoxX. A distribution board is a comprehensive system in itself, comprising copper bus bars, brass neutral links and earth links to facilitate effective distribution of current.

DBoxX is a unique component of an electricity supply system that opens with a pushbutton knob without any extra instrument. These boxes have safety features like circuit breakers and shockproof integrated mechanisms, and are suitable for surface and flush mounting.

The boards are rated at 240V and available in three ranges, including SPN DD 8W, SPN DD 12W and SPN DD 16W.

Integrated process control system

GE Fanuc Intelligent Platforms has released version 1.6 of its Proficy process control system.

Proficy Process Systems is a fully-integrated process control system

that is based on flexible configuration, architecture and choice of controller platforms. It can provide customers in different industries with advanced DCS or hybrid process control system to meet their specific needs.

Proficy Process Systems 1.6 enhances the overall system architecture by adding the support of PAC8000 process controllers and PACSystems redundant Rx3i controllers.

Hard surfacing system

Wear of wire-drawing drums is a common problem in all wire-handling industries as even a mild worn-out surface affects the quality of the wire. Whether a wire is used for fine steel ropes or for bearing rollers, its sur-

face quality is critical to its efficiency, which, in turn, depends heavily on the drawing drum's surface.

Metallizing Equipment Co. (MEC) has come up with a setup for hard surfacing that is a combination of surface preparation and hard surface coating, using thermal spray technology. With this surfacing, the working life of a drum can shoot up drastically, reducing its maintenance cost considerably.

STORAGE

USB flash drives

Kingmax has launched two USB flash drives in India—BJ01 and Super Stick Mini. The BJ01 is capable of USB 2.0-standard high-speed data transfer and can plug directly into the USB port of any desktop or notebook computer.
