

Awards & Recognitions

Infosys most admired Indian firm

Infosys Technologies has been named as the 'most admired Indian company' in a survey conducted by The Wall Street Journal. In the list of '10 Most Admired Indian Companies,' Infosys Technologies is followed by Tata Consultancy Services (TCS) and Bharti Airtel.

The ranking is based on a survey of subscribers to The Wall Street Journal and other business people. The survey takes into account such factors as financial reputation, vision, corporate reputation, quality and innovation.

Virgin most innovative mobile service

Virgin Mobile has bagged the 'Most Innovative Mobile Services Award' for the year 2009 at the INFOCOM CMAI National Telecom Award 2009 ceremony. This award ceremony is held annually with the objective of recognising and providing greater impetus to outstanding telecom players for their contribution in building a robust national telecom network and for providing effective means of communication. Through its brand DNA, Virgin Mobile has established a good relationship with the youth of India.

HP, IIT-B working on new search engine

HP, along with the Indian Institute of Technology-Bombay (IIT-B), is working on an engine to make online search more meaningful. The IIT-B team has already created billions of annotation links between a 500-million webpage corpus and millions of entities known to Wikipedia. The data is being churned on 42 high-end HP servers with over 350 GB of RAM and over 150 TB of disks, donated by Yahoo!.

While the existing major players still expect two-three word queries and return URLs (Web addresses) to browse, the new engine will understand more structures in the query and respond with information nuggets and tables, and not just the links of the pages (sources) from which this knowledge is distilled.

Exide, US lab partner for lead-acid batteries

Exide Technologies has entered into an agreement with the US Department of Energy's Savannah River National Laboratory (SRNL) and the University of Idaho to develop and commercialise the lead-acid battery technology.

This project is a part of SRNL's R&D programme to encourage usage of renewable energy. While SRNL has taken the responsibility of the research work, Exide will provide the resources to commercialise the technologies to improve the performance of lead-acid batteries.

Moser Baer and Philips settle dispute

Moser Baer has settled its long-term licensing and patent dispute with Philips over recordable CDs and DVDs. The settlement reached between the two companies provides solutions of all claims and counterclaims without any admission of liability or wrongdoing by either party, Moser Baer explained.

"This is a strong and healthy development for the electronics industry and will help us to consolidate our market position," said Ratul Puri, executive director, Moser Baer.

BINAY LED-based Lights

PowerLED
Street
Light

PowerLED Hight Bay Light
PowerLED Strip Light

BINAY-Lighting Up The Future

- Extremely low power consumption
- Long life (in excess of 50,000 hours)
- Models with light output to match conventional street lights
- No maintenance required: very low Lifetime Ownership Cost

binay opto electronics private ltd.

44, Armenian Street, Kolkata 700 001, India
Tel: (033) 2242 9082, 2210 3807, 2210 2039

MiniBrite
Miniature LED lamps

Binay MiniBrites utilizes multi-chip LED construction for extremely high brightness, and are one-to-one replaceable with conventional miniature filament bulbs

- Solid-state multi-chip Light Emitting Diode reliability, utilising high brightness multi-chip LEDs manufactured at a Binay Group facility
- A long life of 1,00,000 hours (11years)-fit-and-forget maintenance-free construction
- Ability to withstand an input voltage fluctuation of $\pm 25\%$

Available in screw cap, bayonet cap, midget flange cap, midget groove cap, and slide base. in voltage ratings from 24V to 60V. Special types can be developed on request.
