

***Now it's easy to
cut soldering costs.***

Less Training More Applications Higher Productivity

First, the PS-900 Soldering System has better performance with incredibly low ownership costs. Quite simply, it's designed to cost you less. Less frequent tip changes. Less training investment. Less consumables cost. Even less energy used.

How? Just like our popular Metcal Soldering Systems, the PS-900 maintains constant temperature, via powerful SmartHeat® Technology, that never overshoots. So you won't damage components or substrates.

Add in a compact footprint, faster results, a wide range of soldering tips for more applications and an autosleep workstand that extends tip life and what do you get? Productive soldering that saves you money. It's that easy.
