

Professional Test & Measuring Instruments

Innovative

Feature Packed

Cost Effective

350 MHz 4 Channel Mixed Signal Oscilloscope HM03524

- Sampling Rate : Real Time -4 GSa/s, Random: 50GSa/s
- 2MPts memory , memory Zoom upto 1000,00:1
- MSO with 8/16 Logic Channels
- FFT for spectral Analysis
- 6 digit counter, Autoset, Automeseasurement, Formula Editor
- 6.5" TFT VGA Display, DVI output
- 3 x USB for mass storage, printer & remote control, optional IEEE-488 or Ethernet / USB

New

LCR Meter SM6019

- Comprehensive range of functions, L+Q, C+D, R+Q, |Z|+θ, R+X, G+B, L+AL etc.
- Measurement accuracy 0.2%
- Test Frequencies standard 100 Hz to 25 kHz in 11 steps, and an additional user defined from 500 possible frequencies between 100Hz to 25kHz
- Simultaneously two measured Parameters displayed
- Bin function for component sorting
- Transformer Parameters measurement

4½ Digit Programmable DMM SM5015

- Microprocessor based design
- True RMS
- Electronic Protection against wrong connection
- High Resolution 10μV, 10nA, 10mΩ or 1 Hz
- dB Measurement
- 10 MHz Frequency Counter
- RS-232 Built-in-interface, USB optional
- Remote control & data logging software

Digital Oscilloscopes Meters SMH 20/40/60

- 20MHz, 40MHz, 60MHz Bandwidth
- Digital Oscilloscope, True RMS Multimeter & Data logger in one
- Handheld-easy to carry in field
- Long Memory Length 125KByte
- USB Flash drive for unlimited storage
- 22 Automatic measurements & cursor measurements
- Auxillary parameter measurements like temperature, current, humidity & pressure
- Data logger mode - record data for DMM parameter
