|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

```

Private Sub Check_limits( )
Dim tempsal As Double
'maximum check
tempsal = ryears * (Val(PBasic.Text)
* 12) ' for PBasic only
tempsal = tempsal + ryears *
(Val(PBasic.Text) * 12) * (Val(PrDA.
Text) / 100) ' for PBasic + DA
Maxexgrnt = tempsal
If Exgrntamt > Maxexgrnt Then
Exgrntamt = Maxexgrnt
MsgBox " Limit of maximum amount
exists"
End If
'minimum check
tempsal = 250 * (Val(PBasic.Text) /
30) ' for PBasic only
tempsal = tempsal + 250 * (Val
(PBasic.Text) / 30) * (Val(PrDA.
Text) / 100) ' for PBasic + DA
'tempsal = tempsal + 250 *
(Val(PBasic.Text) / 30) *
(Val(PrHRA.Text) / 100) ' if needed
If tempsal < Minexgrnt Then

```

```

tempsal = Minexgrnt
End If
If Exgrntamt < tempsal Then
Exgrntamt = tempsal
MsgBox " Limit of minimum amount
exists"
End If
The 33-year limit is checked and
adjusted using the code given in the
click event CALVRS_click() of com-
mand button:
If cyears + ryears > 33 Then
ryears = ryears - (cyears + ryears
- 33)
MsgBox " Limit of 33 years exists"
jvys = Int(ryears)
pvmnths = Int(((ryears - jvys) * 12)
- pvmnths) * 30)
EMPRSR.Text = CStr(Int(ryears)) +
" Years:" + CStr(pvmnths) +
" Months:" + CStr(ndvys) + " days"
End If
You can calculate retirement age

```

by adding the retirement age (58 or 60) to the date of birth as given in the code of EmpDOB\_LostFocus() event and ComboRTage\_Click() event:

```

EMPDOR.Text =
CStr(Month(CDate(EmpDOB.Text))) +
"/" + CStr(Day(CDate(EmpDOB.Text)))
+ "/" + CStr(Year((CDate(EmpDOB.
Text))) + rtage)

```

The other code of the program is simple and self-explanatory.

## FORM design

VB forms (front end) are simple to design and use. This program is designed using a single form. Open the VB IDE with new project and new form. Change the background colour property as shown in the screenshot. Set caption property to 'VRS calculator', BorderStyle to 'fixed single', maxbutton to 'false', minbutton to 'false' and leave the remaining properties to default.
