

We are looking for industry **experts** who can help us make an Indian product a **global leader**

It's time for Indian brands to stake their claim in the global arena. Electronics For You, we believe, is one such 'made in India' brand. To accomplish that mission, we seek support of experts from a wide variety of domains—listed below.

- Electronics manufacturing
- Industrial automation
- Test & measurement
- Power electronics
- Renewable energy
- Passive components
- Active components
- Embedded systems
- Lighting & display systems

If you happen to be a domain expert in any of these areas, and would like to work with Electronics For You, please do send us your profile.

Whether you want to join EFY as a regular EFYian or want to act as an advisor/consultant, we are open to both the options. We request you to mention your preference when sharing your profile with us. Plus, please do mention the domain(s) you have expertise in, and the code of role you are interested in.

You can EMAIL us your profile at efyhr@efyindia.com or FAX it at 011-26817563.

Content planning, sourcing and evaluation (code: content)

You can help us plan important topics that need to be covered, guide our journalists, identify new authors from industry or academia, pen your own thoughts and experiences—the list is endless. Bottom line, you will help us create world-class content related to your domain.

Sales & marketing (code: sales)

We often encounter buyers who are looking for particular solutions, and at the same time brands that are scouting for buyers. You can help us bridge the gap. You can guide our team, help us to identify industry players who can benefit by availing EFY's bouquet of services, train our team on the nuances of the industry, and prepare them to help the Indian industry grow faster. The cherry on the cake would be identification of new services that we can offer to further bridge the gaps.

Design & development of circuits and products (code: innovate)

Help us come up with interesting projects to publish, conceptualise innovative circuits and products, and then share our knowledge with our readers in India, and across the globe. If the idea of creating new intellectual property (IP) and then sharing it with the world excites you, we would like to hear from you.

Knowledge sharing (code: knowledge)

Ready to share your knowledge and expertise? Open to the idea of writing articles, posting blogs, publishing white-papers, authoring books or even speaking at seminars? There are lots of questions, issues, doubts, and concerns that need to be resolved. Willing to help us do that?
