

Sony Introduces Xperia T2 Ultra- The Large Screen Smartphone

Powered by 1.4GHz Snapdragon quad-core processor

Sony India has introduced Xperia T2 Ultra, the next evolution in large-screen smartphone design. It brings together the best of Sony's imaging and display technologies with ground-breaking design efficiency to produce a stunning Android smartphone at a mid-range price point.

Key specifications for the smartphone include a 15cm (6-inch) HD IPS display (720p) with Triluminos and mobile Bravia Engine 2 for mobile, a 13-megapixel camera with Flash and Exmor RS for mobile, 1.1-megapixel front-facing camera with Exmor R and access to Sony's one-touch ecosystem of 132 NFC-connected accessories. The device is powered by Snapdragon quad-core 1.4GHz processor with 1GB RAM and 8GB on-board storage (microSD slot expandable up to 32GB). It is powered by a large 3000mAh embedded battery with Battery Stamina mode.

Swipe Telecom's Dual-SIM 3G Calling Phablet

Offers high-quality LCD and Android 4.2 operating system

Swipe Telecom has launched a 3G calling phablet, Halo Fone, which promises to be India's most value-for-money product in its category. The Halo Fone adds to Swipe's existing and impressive range of Halo products which features a unique design blending the form factor of a tablet with the portability and functionality of a smartphone.

The Halo Fone may be light on the pocket, but is heavy on its looks with a sleek design and weighing only 235gm. It combines the best of both the worlds—smartphone and tablet PC, making it an irresistible package.

With a gigantic high-quality LCD size of 16.5cm (6.5-inch) and

one-glass solution (OGS) capacitive touchscreen display that supports a resolution of 800x480 pixels, the Halo Fone provides a video viewing experience closest to that of a tablet.

The form factor is large enough to truly enjoy videos, and small enough to carry in a pocket, making it stand apart from its competitors. The dual-SIM phablet runs on Android 4.2 operating system and is fuelled by a 2800mAh battery, providing hours of endless entertainment.

The phablet is powered by a 1.3GHz dual-core processor and 512MB RAM, which guarantees a smooth experience.
