

Karnataka to have solar energy policy soon

The government of Karnataka is now on its way to encourage people to take up roof-top solar energy production, as it plans to have a stable policy to promote and control the solar energy project. According to a *Hindu Business Line* report, D.K. Shivkumar, Karnataka Power Minister says that the government will encourage the people to take up roof-top solar energy production, under this policy.

Roof with solar panel

To encourage the use of solar power panels for electricity in the state, many incentives will be listed in the policy; like in case of excess power generation, the people can re-route the spare power from the roof-top solar power systems and divert it to the state grid via trade sell.

The set-top box market in India to grow at 29.3%

The introduction of high-definition (HD) channels and smart TVs has led to an increase in digital TV viewing which, in turn, will hike the growth of the set-top box (STB) market. One of the hallmark product categories in the consumer electronics segment, the STB market in India is poised for an unprecedented growth.

The Cable Television Networks (CTN) Amendment Act 2011 mandates digitisation of TV broadcasts pan India by 2014. This bill has provided the necessary thrust for driving growth of the STB market, both cable and satellite.
