

BHEL enters solar wafer business with ₹ 30 billion plant

With solar power gaining momentum, the demand for solar equipment has also risen. Now, the state-owned Bharat Heavy Electricals Ltd (BHEL) is expanding into the renewable energy sector by way of becoming a manufacturer of solar wafers. Marking that since India has no domestic production of this component of the solar photovoltaic (PV) cells, the PSU is the first to venture.

The plant is situated in Sakoli, in the state of Maharashtra. It will start manufacturing the solar wafers along with the photovoltaic cells, modules and solar panels. BHEL has invested a massive amount of ₹ 30 billion in the venture.

NMCC to fund telecom equipment manufacture

With the falling rupee, exports have been a capital waste, since the same money could have been used to strengthen the domestic economy. Hence, the Indian government is setting up \$1 billion venture capital fund to promote manufacture of telecom equipment and devices.

The fund plan, being propagated by the National Manufacturing Competitiveness Council (NMCC), will soon be sent to the prime minister for approval. Further, NMCC plans to join hands with veterans like Vinod Khosla, Sam Pitroda and Gururaj Deshpande for forming an investment committee that will focus on technology improvement.
