Automatic Benchtop SMT Pick & Place Setup

JAKKO 936
Temperature Control
Soldering Station

JAKKO 937
Temperature Control
Soldering Station

JAKKO 850
Analog Hot Air
Rework Station

JAKKO SOLDERING IRON
Soldering Iron -
30 W / 40 W / 60 W

Bench Top Manual Solder Paste Printer

Bench Top Manual Solder Paste Printer Specifications

Simple manual Stencil Printer Machine is small and convenient especially for New Product Trial, some low volume electronics factory, the production of many varieties affordable.

- Easy to use
- Essential for the Production of small electronic tools.

Features

- Can be flat surface printing, manual operation, manual easy to adjust, accurate and reliable.
- Can be used in several specifications.
- Suitable for all sizes of Hand-Printed Silk Screen

WZ - SR 400

Bench Top Automatic Pick & Place machine with Industrial Computer

Features

Medium and low-speed surface-mounting, single - card/wire structure
Able to surface-mount such electronic parts as 5000-7000CPH, SOP 3000CPH
Stable surface-mount of 0402 encapsulated parts to QFP144 components
High-precision movement control system to guarantee system's reliable operation
WINDOWS XP operating system with stable and convenient man-machine interface

Technical Parameter

SMT head installation	Dual SMT heads, four different SMT heads optional	Weight	50kg
Power supply	Three-phase, AC 220V	Mounting speed	3000cpH-7000cpH
Compressed air source	0.5Mpa	Mounting speed	±10um/CPH±40um/GPP±10um/PCB±10um/GFP
Dimensions	892mm x 650mm x 320mm	Auxiliary parts	Max. 27-place coils, able to support 12 feeders
Hard ware	Industrial-level computer mother board, high-precision servo control card, motor drive card, acquisition card	Components to be mounted	Basic: DQD-100 electronic parts, SOP, Advanced: PLCC, QFP
Software	Windows XP	Centering	Mechanical centering
PCB sizes	400mm x 360mm	Drop rate	Electronic parts: 3%-1%, IC: 5%

Bench Top Semi Automatic Re-flow Oven - AR 300

Three independently controlled Heat Zones

- 300 mm (12") wide stainless steel mesh conveyor with variable from 200 - 1800 mm (7.8 - 70.8").
- Only 1400 mm (55") long, heat length 1000 mm (39").
- Bench Top models, Small space, suitable for Low - Middle batch production.
- Advanced long life heating system, high heating efficiency: fast warm up with force hot air convection structure makes PCB and SMD temperature uniform.
- Temperature alarm and fault diagnosis function.
- SSR no touch output with Temperature Controller to monitor environment temperature change, Temperature Accuracy is $\pm 1^{\circ}\text{C}$.

AR 300 Bench Top Semi Automatic Re-flow Oven
