

Experience

the world of thermal imaging

Avoid overheated fuses

Inspect central heating system

Check the condition of electrical engines fast

Discover problems in mechanical installations

FLIR Ex-Series

Thermal imaging camera for fast electrical and mechanical inspections

FLIR Ex-Series cameras are point-and-shoot thermal imaging cameras that give you access to a new dimension. A FLIR Ex-Series camera is an affordable replacement for a spot pyrometer. It provides a thermal image with temperature information on every pixel. Electrical and mechanical problems can be spotted fast and accurate.

With an Ex-Series thermal imaging camera, you can see internal fuse damage, locate electrical problems, inspect electrical cabinets, check bearings, find motor problems, prevent down time and production loss.

All Ex-series are equipped with FLIR's patented Multi Spectral Dynamic Imaging (MSX®) feature.

If you want to have more information about the FLIR Ex-Series or any other FLIR thermal imaging camera please contact:
