

In electro-chemical solutions, we reign

In the formulation, manufacture and supply of conformal coatings, thermal pastes, encapsulants, cleaners and lubricants, we have the solution. Through collaboration and research, we're developing new, environmentally friendly products for many of the world's best known industrial and domestic manufacturers – always to ISO standards.

Combine this unique ability to offer the complete solution with our global presence and you have a more reliable supply chain and a security of scale that ensures you receive an exemplary service.

Conformal Coatings

Enhanced protection for enhanced PCB performance

Conformal coatings are designed to protect printed circuit boards and related equipment from their environment. They conform to the contours of the board allowing for excellent protection and coverage, ultimately extending the working life of the PCB. They protect from moisture, salt spray, chemicals and temperature extremes in order to prevent corrosion, mould growth and electrical failure. Electrolube has the solution.

- UL, MIL and IPC-CC-830 approved
- Solvent removable and solvent resistance coating
- Acrylic, Silicone, Polyurethane and Hybrid Materials
- UV cure and water-based options available
- UV trace to aid inspection
- Thinners and masking products
