

India's Biggest Electronics Design Awards

ELECTRONICS
FOR YOU
DESIGN
CONTEST

THE 2013 WINNERS

Open Innovation Awards Category: Designs by Professionals

1st Position: **INDRANIL MAJUMDAR**
(Individual Participant)

Project: An advanced home signal warning system for train protection

What is it?

A project for railway systems and their protection, based on Renesas GR-Sakura, GNSS with SBAS and GSM-GPRS/3G/4G

2nd Position: **BUTANI RAVI CHANDULAL** (Individual Participant)

Project: Smart SOS system

What is it?

This project involves designing a Renesas Rtx63 MCU-based fool proof integrated system for detecting vehicle impact/crash/fire/ flood and activating an emergency response facility with crash location information using GPS/GSM. The same system can be used for stolen vehicles and as a data logger.

3rd Position: **Kaustubh Tapke**

Project: Fabric management system

What is it?

FMS (fabric management system) measures and keeps a record of the fabric weaved by a power loom. It can keep a record of the length of the fabric, the time when it was weaved and the ID of the worker operating the loom.

Open Innovation Awards Category: Designs by Students

1st Position: **Samyak M. Machale**
(Team Participant)

Project: Virtual programming logic device

What is it?

The device is a micro-controller-based testing and debugging system. It deals with minimising the cost, time and efforts involved in product development of digital circuits. It aims to provide a feasible and portable GUI-based alternative over conventional testing methods, with enhanced functionality and flexibility.

2nd Position: **Gajendra Singh Tanwar**

Project: AVIM Sparsh

What is it?

Augmented visual human-computer interface (AVIM-Sparsh) is a project that falls under the category of human computer interaction which uses both hardware design and software applications.

3rd Position: **Tanmay Vinay Shinde**
(Team Participant)

Project: Humanoid robot

What is it?

This is a design of humanoid and drone hybrid for neutralising threats and surveillance

Special Category Awards Category: IoT

1st Position: **J.Binu**
(Individual Participant)

Project: Home automation for aged and disabled

What is it?

The project allows the aged and disabled to control six devices, open/lock the door and feel secure through security systems.

2nd Position: **Souradeep Mukherjee**
(Team Participant)

Project: Labview farm automation Android

What is it?

A remote-controlled robot equipped with a robotic arm and a wireless camera, whose operation will be controlled by an Android application through LabVIEW to make the task of the farmer easier by using various tools of the robot.

Special Category Awards Category: Rural

2nd Position: **N. Ramanshankar**
(Team Participant)

Project: Border alert system for fishermen

What is it?

Boundary alert system for fishermen using GPS and a programmed micro-controller.

OIA DbS #2:
Gajendra Singh Tanwar

OIA DbS #3:
Tanmay Shinde and team

SCA IoT #2: Souradeep
Mukherjee and team

SCA Lighting #2:
Saigopal R.M.
