

Special Category Awards Category: Lighting

1st Position: RAGHAVENDRA S.H.
(Team Participant)

Project: Remote-controlled efficient lighting

What is it?

An optimal room lighting set-up that is remotely controllable, thus ensuring improved and uniform illumination throughout the room and enabling considerable energy conservation at the same time.

2nd Position: SAIGOPAL R.M.
(Individual Participant)

Project: LED-based HS1H4 automobile headlamp with anti-glaring pass signal

What is it?

A headlamp that is capable of providing illuminated and focussed high beam and anti-glaring low beam similar to halogen lamps and can replace them in their existing slots without any modifications.

T30D: Pavithra S. A. and team

Special Category Awards Category: Mango Pi/Raspberry Pi

1st Position: Mahendra Dobariya
(Team Participant)

Project: i-Home Hybrid

What is it?

i-HOME hybrid is a project which, as its name describes, is made with different kinds of modules and sensors that take care of everything in a home or office—from switching to security, controlling to automation and monitoring to safety. i-home can be used in a home and in a township.

2nd Position: Amutha Bharathi M
(Individual Participant)

Project: Smiley Pi

What is it?

A multi-purpose status notifier add-on for Raspberry Pi

T30D: Alshay Kumar Dekate and team
