

We couldn't make engineering easier. So we made it easier to teach and learn.

The world's first dedicated teaching oscilloscope: the TBS1000B-EDU Series.

Meet the only oscilloscope designed to tackle today's test challenges while preparing tomorrow's engineers for the future. With an exclusive courseware capability, the full-featured TBS1000B-EDU oscilloscopes provide an efficient way for instructors to teach and students to learn fundamental electronic concepts. And with a starting price of just \$433, it's a powerful solution at an affordable price.

Advanced Features	Impressive Benefits
■ Highest sampling accuracy and up to 200 MHz bandwidth	■ Industry leading sampling technology with 10x oversampling to accurately capture fast signals
■ Integrated courseware	■ Allows educators to conveniently create and administer lab exercises that are viewable on the scope
■ Auto-set enable/disable	■ Enables educators to create labs where students can learn basic oscilloscope operation without depending on the Autoset button
■ Courseware online community	■ An interactive, multilingual community platform where educators can share lab courseware with peers from around the world
■ 34 automated measurement types	■ The most automatic measurements in its class, for maximum efficiency
■ High-resolution 7" WVGA display	■ Crystal-clear viewing experience
