New Design Tool App For Smartphones

Coilcraft has announced its new RF and Power Inductor Product Finder app for Apple and Android smartphones. This free application enables users to quickly select the best inductor for their design and order free evaluation samples, all from their mobile phone. The Power Inductor tool provides instant comparisons of core and winding losses, as well as DCR at temperature analysis. It also allows users to quickly compare L, Q, Ω and ESR, analyse inductance at frequency, and search for products with the highest Q or impedance.

PNR Status Checker For Indian Railways Travellers

UCWeb has introduced a new integrated PNR and train status checker feature, Train Enquiry, for its UC Browser smartphone app for the Android, iOS and Windows platforms. This free service will provide Indian Railways travellers information about train status, schedules and routes. The service can be accessed via various links on UC Browser's homepage navigation or simply by visiting train.ucweb.com. Train Search shows the fastest route to get to a destination, allowing users to search for trains between stations, seat availability, as well as the corresponding fare.

Now Book Auto, Taxi Using AUTOnCAB App

Here's an app that addresses one of the most important issues of Delhiites. A Delhi-based company called NGA Technologies has developed a mobile app that lets people book cabs and autos using the Internet or through a phone call. The app called AUTOnCAB connects passengers and auto/cab drivers. The company wants to make the complex and waiting process of commuting by auto or cab hassle-free with use of smartphones.

Videocon Introduces VPhone

A low-cost feature-rich phone with a large screen

Videocon Mobiles brings in this sleek looking device that boasts of international finish and style. It features a rubberised back finish that is designed for superior grip and cool looks. Phone also comes with a first-in-class two interchangeable back panels that allow the consumer to show off different styles as per occasion.

The VPhone Grande features a large 7.1cm (2.8") QVCA display for an immersive multimedia experience along with movie-hall like video playback. The large screen also offers the con-

venience of big on-screen fonts that enable elderly people to dial numbers and access on-screen menu easily.

The VPhone Grande has inbuilt six-regional-language support that includes Hindi, Punjabi and Tamil. It has 1.3MP camera, 1100mAh battery and features like a movie juke box application, security inbox, smart auto call recording and smart call divert.
