

Solar Energy: Stay Up-to-Date

Our planet Earth receives a huge amount of energy from Sun in the form of radiant light and heat. Solar photovoltaic cells and the panels built around them are becoming extremely popular source for harnessing these energies. Here are some of the sites which can enlighten you on the topic

NIRAJ SAHAY

freesunpower.com

The website provides a good tutorial for setting up a solar power system for producing electricity from sunlight. The tutorial covers solar panels, charge controllers, power inverters, storage batteries, AC generators, wires & cables, meters & monitors, and more. Complete system wiring diagrams plus interactive online design tools are also featured with a point-and-click interface. The site can work as a place to learn and have fun with solar power.

<http://indiasolarmarket.com>

indiasolarmarket.com

The website aims to be a one-stop portal for everything on solar energy in India. It provides daily updates on the Indian solar market in the form of news, developments, market and policy, upcoming events and expert opinions. The site also has an active jobs portal which provides a platform for both candidates and employers to connect with one another.

builditsolar.com

The website has plans, tools and information to help you build different solar projects. It has hundreds of projects ranging from lighting an electric bulb to building solar homes. It also has design information and tools for building renewable energy projects. The website offers a monthly newsletter which can be subscribed to by anyone to stay updated on such projects.

<http://www.builditsolar.com>

www.solarpaneltalk.com

solarpaneltalk.com

The site is a discussion board on solar panels and solar power products. Currently, the forum has about 18,600 members with 106,500 posts and 12,000 threads. Anyone interested in solar panels and other related products can register for free and take part in discussions. The topics for discussion on the forum include solar panel systems on the grid, solar industry, off-grid solar, solar thermal, solar power lighting, do-it-yourself solar panels and other general discussion on solar energy.

sourceguides.com

The site is a comprehensive buyers' guide and business directory to more than 27,000 renewable energy businesses and organisations worldwide. Its source guides have been providing comprehensive up-to-date information on renewable energy businesses worldwide since 1995. It adds more than 100 new renewable energy businesses each month. It has a section for news on the latest in renewable energy which gets updated daily.
