

State of the Art 360° Around View technology™,
Full TFT Cluster Display with 3D Graphics
Display Capability Solution.

Fujitsu Automotive Graphics Display Controller (GDC)

MB86R11/R12 Product Features:

- High performance Cortex A9 CPU with 2D/3D Graphics Processing Unit to achieve Hi-Performance computing and Image Processing functions.
- Multi Input 4 channel High Definition (HD) Camera Sensor Interface with world leading 360° Around view algorithm
- Approaching object recognition function ideal for ADAS system
- Complete hardware/software platform for quick turnaround time

Applications:

- 3D around view system, Full TFT dashboard display, Central Information Display system
