Start-up launches safety device

A Pune based start-up, CarIQ, has developed a wireless technology that aims to ensure passenger safety while travelling in cabs. It drives data from the vehicle's microcomputer and sends it to servers hosted on the Cloud. Collected data is analysed and reports are generated on the condition of the car and driver's credibility. A small device, it can be plugged-in to the onboard diagnostics of the car port. It keeps track of all data collected from electronic systems, like the engine, anti-lock braking system and air bag system.

IObit introduces all-in-one utility for PC security

IObit, a system utility and security software provider, has announced the release of Advanced SystemCare Ultimate 8, an all-in-one utility for PC protection and system optimisation. With improved anti-virus and anti-malware engines, it protects the system, web-browser, online surfing and privacy data in real-time, and speeds-up a slow computer. It scans for viruses, spyware and malware threats to ensure computer security. To protect browsers, it comes with additional features, such as homepage protection, plug-in/toolbar cleaner and browser anti-tracking. It also helps clean and fix a variety of PC problems and boost up speed. The product comes with a customisable, friendly and easy-to-use UI.

iKaaZ and DCB Bank launch mobile payment solution

iKaaZ, a mobile payments company, has partnered with DCB Bank Ltd to launch an innovative mobile payment solution in an effort to make India a cash-less economy. As per the agreement, iKaaZ will launch the product, including its NFC based tap-and-pay product, targeting the merchant eco-system and other related offerings directly targeting consumers.

Waaree Energies Introduces Solar Mobile Charger

Now charge two devices simultaneously

Price: ₹ 3239

Waaree Energies Ltd, a leading solar panel manufacturer in India, has introduced its first rugged solar mobile charger. It has 5000mAh high-grade li-polymer battery and can charge two devices simultaneously. It has a matt-finish solar panel to protect it from scratches with an anti-slip outer-cover design. It is water and dust resistant, and shock-proof, which makes it an ideal companion for an outdoor trip.

This charger allows you to charge a wide variety of devices like mobile phones and tablets. It takes 12-16 hours to fully charge the battery in sunlight, while 4-6 hours using AC/USB adaptor.

Tata Sky Launches 4K UHD Set-Top Box

With four times the resolution of full HD

Tata Sky Ltd, a joint venture between Tata Sons and 21st Century Fox, has launched 4K UHD set-top box (STB) in India, taking television viewing to an unimaginable level. Tata Sky UHD 4K beams content at a resolution of 3840 × 2160, which is four times the pixels of full HD.

Tata Sky uplinks all channels from broadcasters to its satellite, INSAT 4A, which sends these

channels in digital format to the mini-dishes fixed outside homes. The mini-dishes relay channels to the STB, which further decodes the channels and sends these to your television.

Other highlights of the device are HDMI 2.0 that supports a higher frame rate, 7.1 channels of premium quality surround sound, 10-bit true colour and 16:9 widescreen aspect ratio.

Price: ₹ 6400
