efficient, environment-friendly LEDs. With this project, the government aims to save ₹ 7000 million in cost and electricity consumption of about 250 million units. The ministry has planned to extend the lighting system to around 500,000 street-light points.

The project would be launched in phases in the capital, after commencing from North Delhi Municipal Corporation (NDMC). The government will push it further to the rest of the civic bodies in the capital. Besides NDMC, the capital covers South Delhi Municipal Corporation (SDMC), East Delhi Municipal Corporation (EDMC), New Delhi Municipal Council and the Cantonment Board for Delhi Cantonment area. The entire expense of the project will be borne by Energy Efficiency Services Ltd, a joint venture company of PSUs under the Ministry of Power.

Digital India initiative receives investment

While addressing a committee meeting, communications and IT minister, Ravi Shankar Prasad said, about 700,000km of cable for broadband would be laid in the next three years, in addition to the one-million-km cable already in place.

The minister also said that 50,000 gram panchayats would be given broadband facility in the first phase and 0.25 million within the next three years. While replying to the concerns of members towards the poor service of BSNL network in the country, he said that more funds are proposed to be given to the public-sector telephone service providers during phase VII to bring improvements in the working and to make the service commercially active.

During an event at FICCI, Prasad said that ₹ 180,000 million worth of investment has already been proposed under the Digital India initiative, out of which ₹ 40,000 million has already been approved. He mentioned spectrum issues to provide high-speed connectivity and regulatory control. He emphasized
