ANANT ENTERPRISES

Anant Enterprises is a name synonymous with design and manufacture of high quality wound components like transformers, coils, chokes, inductors and power supplies. The company is headed by a professional and innovative management. In order to assure precision, quality and timely deliveries, the company maintains a state of the art manufacturing unit. This unit is well equipped with high speed and accurate CNC winding machines, epoxy/varnish casting/encapsulation plant and modern test equipments. Moreover, Anant Enterprises has implemented various stringent procedures/test equipments/jigs for in-process testing and modern equipment for inward and final quality control. It is an ISO 9001:2008 certified company.

Their aim is to deliver pre-determined quality of materials at competitive prices with high consistency.

The company believes in competitive pricing, adherence to strict delivery schedules and responsiveness to customer requirements. This has helped the company to become a preferred vendor for magnetics with the OEMs.

Why Anant Enterprises?

- Very well equipped.
- Have an experienced and motivated workforce.
- The factory is managed by a technocrat from a premium institute and as such understands the technical language of requirement.
- Centrally located and very well connected just two hours away from New Delhi, capital of India.

The product line includes wound components for SMPS, high frequency high voltage transformers, sensing transformers, impedance matching transformers, signal distribution transformers, pulse transformers, power transformers, coils / inductors and power supplies.
