

Anritsu is a pioneer in the implementation of next-generation wireless technologies while continuing to support existing standards. It offers solutions for the full range of 2G, 2.5G, 3G, and 4G telecommunications as well as current and next-generation 3GPP, 3GPP2, and IEEE standards including 1xEV, GSM/GPRS, W-CDMA, HSDPA, 802.11, and 802.16. The portfolio encompasses instrumentation ready to test both early next-generation specifications and legacy technologies. From the chipset to the installed product, Anritsu's wireless test equipments cover the entire life cycle of wireless infrastructure and user equipment. Anritsu is the industry standard for RF and microwave test and measurement equipment for both field and lab environments, with instruments operating at all frequencies up to 110GHz and beyond. The company also offers a complete range of test and measurement equipment for the optical communications industry including R&D, production, installation, monitoring, and manufacturing.

## ASYS GROUP

ASYS Group is a global technology company and a leading manufacturer of handling, process and customised equipment for the electronics and solar industries.

In addition to proven standard products, ASYS provides customised solutions in the front-end and back-end areas. The corporate headquarters in Dornstadt near Ulm, Germany controls the activities of the subsidiaries in more than 40 countries and always ensures the highest standards in quality and service.

The ASYS Group provides a unique product portfolio from different fields of technology such as handling, marking, depaneling, final assembly, testing, and screen printing. Therefore, complete production lines can be offered from a single source.

The group has a department that deals only with the development of new technologies. A team of about 20 developers and application specialists are busy every day to develop machine concepts and technologies that meet the highest levels of accuracy, precision and process stability.

ASYS products exemplify the prestigious Made in Germany trademark. Precise, high quality machines that are intuitive to use and offer best functionality. ASYS has 124 employees worldwide, including developers, engineers, designers and application experts, working on the research and development of the group.

## B&B BATTERY

As one of the best quality battery manufacturers in the world, B&B Battery was established in 1992 in China by its Taiwanese parent company. With focus on valve regulated lead acid battery, the company offers the most reliable and valuable batteries into diversified markets.

Through 20 years of continuous effort, the company practices quality control but also effectively infuses technological innovation into practical applications. Based on traditional lead acid batteries, a variety of VRLA series were created for fitting extended cycle life as well as long duration at lower rate discharging. Apart from profound knowledge on AGM battery, in recent years B&B has developed its own GEL, spiral and traction batteries for wind power, solar, telecom, EV/HEV, motive and other applications.

Its sophisticated facilities and technical teams pave the strong foundation for providing responsive technical service to its customers. Moreover, the solid R&D muscles enable its capability in developing dedicated battery tackling specific application as well.

## CHIPMAX

The company's focus is to provide a sole window approach to its customers for their end to end solutions through design engineering, prototype, system integration, pre-production and EMS/contract manufacturing capabilities involving strategic OEM - ODM alliances and networks.

Chipmax's endeavours to drive down the costs, to make its customers more competitive in the market by managing the product compliance factors, mitigating R&D and production overheads.

Apart from product realisation the company also has a range of ready to use COTS (Commodities – Off – The – Shelf) addressing various electronics engineering domains listed to provide an immediate solution for the customers' need.

The company plans to continue its emphasis on quality and innovation to meet ever changing needs of the customers.
