

Salient features of Fleet Robo solutions are user-friendly web and mobile App, end-to-end industry specific solutions, real time vehicle tracking, intelligent rule based automatic vehicle dispatching, job execution and management, readymade business reports, instant alerts, sensors integration, automatic billing and invoicing system, driver behavior solution, advanced hardware architecture, cost saving application and many more.

Fleet Robo recently introduced prototype of car-cockpit and infotainment system which is specifically designed for the automotive OEM's to ease driver comfort and connectivity. The solutions provides connectivity with vehicle on-board diagnostics with digital display for fuel, temperature, tyre pressure, seatbelt, door and parking status.

FLIR SYSTEMS

FLIR is the largest commercial infrared company in the world, with nearly 50 years of experience in building and integrating high-performance infrared cameras, giving us a command of these specialised technologies that no one else can touch.

FLIR is the world leader in the design, manufacture and marketing of thermal imaging/IR cameras for a wide variety of applications in commercial, industrial and government markets. Pioneers in the commercial infrared camera industry, the company has been supplying thermography and night vision equipment to science, industry, law enforcement and the military for over 50 years. From predictive maintenance (electrical and mechanical application for manufacturing, service and electronic industries) condition monitoring, building diagnostics, non-destructive testing, R&D, medical science, temperature measurement and thermal testing to law enforcement, surveillance, security and manufacturing process control. FLIR systems has been making its mark for years. FLIR offers the widest selection of infrared cameras for beginners to professionals. FLIR design and manufacture all of the critical technologies inside the products, including detectors, electronics, and special lenses. It also offers a new line of test and measurement instruments built upon commitment to innovation, quality, and reliability. These are designed to meet the day to day needs of electrical and mechanical trouble shooting in different industries and help increasing productivity, connectivity and flexibility.

With over 60 offices and the largest installed infrared camera base in the world, FLIR offers its customers unparalleled service, the best post-sale technical applications support available and world-class infrared camera and thermography applications training.

GLOBETEK

Globetek has been a leading manufacturers' representative for measurement of electrical parameters in industrial, traction and automotive markets, power semiconductor testing systems, thermal test systems, motor testing systems, electrical safety testers and various other analytical and testing equipments in India since 1992. With over 18 years of experience along with the philosophy of customer satisfaction, the company has been able to provide the best solutions to customers. The range of analytical and scientific testing equipment offered by Globetek includes current and voltage transducers, hi pot-dielectric testers, crystal oscillator test systems, explosive safety ohm meters, inertial dynamometers, portable dew point meters, handheld coating thickness instruments, regenerative dynamometer systems, bench top temperature forcing systems and current probes. The company also provides pre-sales consulting and works with customers to achieve their project requirements. The company has a team of technically trained and experienced engineers offering installation, training, servicing and annual maintenance contracts.

GOLA ELECTRONICS

Gola Electronics, based in Sahibabad site IV industrial area of Ghaziabad, specialises in the design and manufacturing of medium and high voltage transformers to fulfil customer's specification. The company has set standards in the manufacturing of transformers. With over two decades of experience in manufacturing and design and high quality materials the company provides great value for its transformers. The company also has modern sophisticated testing facility and excellent support services.

Gola has supplied more than a million of small transformers for consumer industry and several thousands of medium size transformers for others.

The factory complex is extended over an area of 3000sq ft. The covered area is partitioned into various blocks viz administrative block, design and engineering section, coil winding and tapping sections, sub-assembly sections, oil filtration plant, vacuum plant, assembly section, testing section, general machine shop, sheet metal fabrication unit and a store.

The company has a team of experienced system analysts continuously working on analysing new projects, followed by the testing team conducting all the possible tests to make sure that the project is meeting clients' satisfaction.
