

GOOD WILL INSTRUMENT CO LTD

Founded in 1975, Good Will Instrument Co Ltd is the first professional manufacturer in Taiwan specialising in electrical test and measurement instruments. It began as a manufacturer of power supplies and quickly expanded into the development of high precision electronic test and measurement instruments with brand identity GW Instek. After 39 years in the test and measurement industry, GW Instek has grown to become one of the most recognized manufacturers of test and measurement instruments in the world. Today, GW Instek offers more than 300 products across five key lines – oscilloscopes, spectrum analyzers, function generators, power supplies and basic test and measuring instruments. The industries that GW Instek serves include automotive industry, defence and avionics, semiconductor, telecommunications, consumer and industrial electronics, automation, research and education etc. GW Instek has rapidly expanded its foot-prints worldwide. With headquarters located in Taipei, Taiwan, GW Instek has subsidiaries in mainland China, America, Japan, Korea and Malaysia. GW Instek products are sold in more than 80 countries worldwide.

Together, the rich experience and expertise at GW Instek allow it to deliver high-performance electronic test and measurement solutions with one of the industry's best price versus performance ratios. GW Instek has consistently produced highly durable products carrying with some of the industry's lowest cost of ownership.

GUANGZHOU CEPREI INSTRUMENT & EQUIPMENT CORPORATION

Guangzhou CEPREI Instrument & Equipment Corporation, is a wholly owned subsidiary of the Fifth Electronics Research Institute of Ministry of Industry and Information Technology (CEPREI). CEPREI is the first institute specialising in environmental test equipment manufacturing and technical research with more than 60 years of experience in the field. It is the only comprehensive institute in China that can provide testing, certification, analysis, evaluation, calibration, special equipment development, production, sale and other technical services.

HK WENTWORTH INDIA PVT LTD

HK Wentworth India Pvt Ltd has the solution for all kinds of electro-chemical problems. You can trace Electrolube's (a division of HK Wentworth India Pvt Ltd) roots back to 1941, when Henry Kingsbury formed Kingsbury Components to manufacture volume controls. It was here that Henry formulated a specialist oil, that enhanced the electrical performance and lifetime of the contact surface in addition to reducing friction of moving parts. This breakthrough was the catalyst for a whole range of contact lubricants, forming the basis of the company now known as Electrolube. As global specialists in all aspects of formulated chemical products for the electronics industry, Electrolube offers a vast array of products including thermal management materials, conformal coatings, encapsulation resins, electronic cleaning solutions and general maintenance products.

With a presence in 55 countries and expanding, the company's ethos in innovation and service remains strong. With its expansive product range of formulated chemical products, the company supplies leading manufacturers of electronics, industrial and domestic devices for a variety of industries, thus offering complete solutions at all levels of production.

Extending its personal touch to every sector, Electrotube's products are integral to the manufacture and maintenance of electrical and electronic components and assemblies in many sectors which include: automotive, military, aerospace, transport, marine, telecommunications, medical, consumer electronics, industrial electronics, traction, utilities, education and service, repair and maintenance.
