NEXTGEN MANUFACTURING SERVICES PVT LTD

Nextgen Manufacturing Services Pvt Ltd (NMSPL) was founded in 2008 providing high quality electronic contract manufacturing services tailored for low to mid-volume product lines. Having an expertise in prototyping and volume manufacturing, it offers solutions designed to match the requirement of the customer. We are living the dream of 'Make In India'.

Nextgen is among the earliest adopters and believers of the 'Taguchi methods' to improve quality of manufactured goods.

NMSPL manufacturing facility is housed in an 10,000sqft air conditioned production floor with ESD protected assembly process. The company has two high speed JUKI SMT lines based on JUKI SMT JX 300 LED and KE 2030 with a combined capacity of 1.1 million SMT mountings per day. Both lines have 1500mm conveyor system and 40 feeder inputs of 8mm tape components. The SMT lines are complemented with a series paste printing machine NLTS 1818, dedicated wave soldering machines for each manual line – EPS Model DWSW 180 and a Main Reflow line with SMT 1.7TL reflow oven, stand-by five zone reflow oven (EMST gallant), air dryer and air compressor support.

The company has four manual lines for PTH (Plating Thru Hole) components. Its USP is capability to design, test and validate products for customers by offering end to end turnkey box build services supported by labs where it houses state of the art PCB design tools, signal integrity tools and thermal analysis capabilities.

The company caters to sectors including LED lighting, energy meters, consumer electronics, automotive and industrial.
