

UPSINVERTER.COM

Since the company's inception in 1996, UTL has evolved itself into a renowned name in the field of power electronics. It offers an extensive range of products including UPS, inverters up to batteries; enabling us to accommodate all the needs of our customers up to their full satisfaction.

UTL has served a number of India's prominent companies and agencies including Air India, Indian army, Indian railways, State Bank of Saurashtra, Delhi University, AIIMS and others.

UTL's advanced products along with a huge production capacity supported by an expanding dealer network has scaled up our customer support significantly. It is worthwhile to mention that the manufacturing unit of the company at Parwanoo in Himachal Pradesh has the capacity to produce up to 1000 high quality power conditioning units per day.

After deepening its roots in the Indian market with an expert range of products and exemplary service, UTL is now trying to mark its presence globally. Already operating successfully in a number of Asian and African countries.

UTL made its first landmark a decade back by introducing SMT inverters in the country with SMD technology. With the introduction of SMD technology, UTL leads the promotion of single card reliability and small size inverters. Another milestone accomplished by the company was the introduction of four stage charging technology.

VASAVI ELECTRONICS

Vasavi Electronics was established in 1979 in Hyderabad, led by a team of highly qualified managers and research engineers with decades of experience in the instrumentation field. Vasavi Electronics started taking up challenging projects on software controlled automatic test equipments (for testing coils, transformers, relays) and has been an import substitute to various sectors like automobile, aero space, railways, consumer electronics etc. The products produced by Vasavi have reached different parts of globe including USA, Mexico, China, UK, France, Germany, Switzerland, Hong Kong, New Zealand, Brazil, Thailand, Taiwan, Haiti, Singapore, etc.

VITAL ELECTROCOMP

Established in 1997, Vital Electrocomp is one of the leading manufacturers of terminal blocks and connectors for PCB applications. We indigenously manufacture one of the widest ranges of PCB terminal blocks / connectors and PCB fuse holders in the Indian market today. Vital offers a wide range of versatile, compact, low profile modular terminal blocks that interlock to form a terminal strip. For screw type terminal blocks these are available in 2 poles and 3 poles, for screwless series one can add as many rows as desired whereas for combicon terminal blocks 2 to 14 ways are available with design capable of joining various combinations to obtain the desired number of connections.

Vital Electrocomp range consists of screw type terminal blocks also known as cage clamp design. Screw type connections use a rising cage design to secure the conductor ensuring the solder joints are intact. The screw type terminal blocks are recommended for applications with standard I/O and low current industrial devices. The range also covers screwless or also known as push fix type or spring type terminal blocks. Screwless terminal blocks offer a tool free connection with solid or ferruled wires saving time of connection as well as making it faster and convenient to connect and disconnect in applications like EPABX systems. These screwless terminal blocks also widely known as spring type connectors are strongly recommended in vibration sensitive applications where under or over torquing may be of concern.

WUHAN LIXING TORCH POWER SOURCES CO LTD

Wuhan Lixing Torch Power Sources Co Ltd is a national hi-tech enterprise located in the Guan Dong Technical and Industrial District. It is one of the main export enterprises for mechanical and electrical products, of which mostly are exported to Europe, North America, South-East Asia and Hong Kong, among other regions. The company's product portfolio covers Li-MnO₂, Li-SOCl₂ and Li-ion batteries that are applied to instruments, meters, computers, cameras, etc. From 1998 to 2001, Wuhan Lixing successively passed ISO9001, ISO14001, OHSAS18001 system certification, UL CE & UN safety certification and gained ASUS Green Partner.

XIAN XIWUER ELECTRONIC & INFO CO, LTD

The product range includes surge protective devices (SPD/Arresting protector) for power supply system and communication system and IT system, high voltage ceramic capacitor for capacitive insulators, transformers, lightning arresters, SF₆ breakers, varistor (VDR/MOV) for voltage surge protection, PTC and NTC thermistor.
