

3D printing for everyone

Whether as inspiration for students, as challenge for kids or as tool for checking out your own craftsmanship – with Fabbster 3D printer you will widen your technical know-how and realize your own creativity.

Think about your expectations: Take the fully-assembled version for a quick start option or the kit for a deep understanding. From engineering, accessories, toys, architectural mock-ups, lost buttons, hangers and creative name tags or little everyday things to universal design and construction projects.

Turn your ideas into reality with Fabbster.

German Engineering

Fabbster is award winning design using linear ball bearings with stainless steel and plastic components reinforced by fiberglass.

Precision Electronics

High quality 24V electronics and stepper drives with speed as high as 600mm/s. Supports online and offline printing.

Print in Big Sizes

Fabbster has one of the biggest build size in its class. 225x225x210mm

Stick Deposition Moulding

Fabbster has re-invented 3D printing with SDM technology. Profiled LUKE sticks has anti-slip mechanism, giving better precision and print quality.

Evolving Machine

The modular design of the machine keeps today's fabbster fit for tomorrow.

Professional Software

Fabbster comes with licensed netfabb studio engine, giving you the best 3D file processing and machine interface.
