App to add your account. Then, click Scan. The app will quickly scan the QR code, which is shown at step 3 in Fig. 14.5. Now, click Pair to complete the process. The app will generate a new pass code automatically after every 30 seconds. If you ever need to use a code to sign-in to your Microsoft account and the phone is offline, you can use this app to get the code.

## Dropbox

Dropbox is a great source for storing data and sharing information across the Internet. An extra layer of security can be activated in Dropbox security settings, where a user has to register his or her mobile phone number to do so (Fig. 15).

## Yahoo!

Most of the popular mail websites, such as Yahoo! and Gmail, have already inte-
