Sign-In Verification as shown in Fig. 16. Once this is done, you can register your mobile phone number to get further pass codes from Yahoo! during the login process.

Amazon web services

If you use Amazon's web services, such as Amazon S3 or Glacier storage, you can protect your accounts by enabling TFA via Google's Authenticator

app for Android, iOS, Windows Phone and BlackBerry (Fig. 17). This app can be downloaded on a mobile to access Amazon services securely.

WordPress

If you are a blogger and do not want anyone getting unauthorised access to your account, the WordPress blogger website provides an extra layer of security. It also supports Google

TABLE II
Some Web Services That Use Two-Factor Authentication

Web service	TFA name
Microsoft	Two-factor verification/Authenticator
Apple	Two-factor verification
Amazon web services	AWS multi-factor authentication
Dropbox	Two-factor verification
Facebook	Login approvals
Twitter	Login approvals
Google	Two-step verification/Google Authenticator
Microsoft/Hotmail	Microsoft account security code
PayPal/eBay	Security key

Authenticator app for Android, iOS, Windows Phone and BlackBerry. This feature can be activated in WordPress account settings as shown in Figs. 18.1 and 18.2.

In the concluding part of this article, next month, we will see how much does TFA cost, with an exhaustive list of the various tokens/services available.

To be concluded next month
