

New Technology

I have been an EFY subscriber since 1997. EFY, being an international magazine, should cover articles on new technologies, innovative ideas, new devices, CES 2015, new electronic components, R&D, Android products, robots, artificial intelligence, nano technology and DIY projects related to GPS, GSM, Bluetooth, Wi-Fi, NFC, Raspberry Pi, Arduino, IR remote, solar and others.

Kindly do not publish circuits related to sirens, running lights, LED projects and power supplies. These are just hobby projects. Engineering students are not supposed to show a running light or disco light as a college project.

Balamurugan
From Facebook

EFY. Thanks for the feedback! Some of these topics have been featured in this as well as past issues of EFY. EFY is for the electronics fraternity and caters to every segment, including hobbyists, students, experimenters, professionals, academicians and industry. We keep a balance on topics to make sure that it is useful to even a novice.

Robotics Projects

I am interested in robotics. Please provide a list of published robotics projects in EFY.

Naveen kumar
Through e-mail

EFY. You may refer to the following robotics projects published in EFY:

- Namastae Robot with Voice, April 2014
- Soccer Robot, January 2014
- Arduino Android Robot, December 2013
- Accelerometer Based Gesture-Controlled Robot, May 2013
- RF Based Motion-Sensing Robot, April 2013

From Facebook: EFY's Electronics Design Community

I need a circuit diagram for a water-level indicator with sound indication.

Shafeeq Rahman

EFY. You may refer to 'Water-Level Indicator with Alarm Circuit' available at http://electronicsforu.com/newelectronics/lab/search_lab.asp?words=water

□ I have a doubt regarding designing a microstrip patch antenna. How should I simulate the microstrip patch antenna?

Dev Nesan

EFY. You may refer to 'Microstrip Patch Antenna' software article published in EFY November 2013 issue.

'Spot An Error' Award Winners

In eStyle First Look section of December 2014 issue, under 'Videocon Launches Flagship Infinium Graphite Smartphone,' it is wrongly mentioned that the memory can be expanded to 32GB via microSD card, since an external microSD card is not supported in this device.

Siddharth Kaul

1. In 'SafeDrive: An Automatic Accident Management System' article under Innovation section in December 2014 issue, in the box item 'Solving challenges: Accident detection,' "1g=9.8 metres per second" is wrong, because metres per second is the unit of velocity. The correct unit of acceleration is "metres per second squared."

2. In 'Interesting Facts' article under Little-Known section in December 2014 issue, on page 26, abbreviations for MASER and LASER are wrong. MASER stands for microwave amplification by stimulated emission of radiation, and LASER stands for light amplification by stimulated emission of radiation.

Bikash Anand

- RF Based Dual-Mode Robot, March 2013
- Gesture-Controlled Robot, January 2013
- Arduino Based RF-Controlled Robot, December 2012
- Simple Line-Following Robot, July 2012
- Robotic Arm, November 2011

To get the back issues of EFY, you may contact our associates, Kits'n'Spares (info@kitsnspares.com), or buy digital versions from online stores. We also have an EFY app for Android, where you can download subscribed, recent EFY issues.

Long-Delay Timer

In 'Long-Delay Timer with Real-Time Clock Display' DIY project published in December 2014 issue, on page 75, in the last line, "capaci-

tors C1 and C2 (22pF each)" should be read as "capacitors C4 and C5 (22pF each)."

Praveen S. Javali

EFY. Thanks for pointing out the mistake! We will try to avoid such typographical errors in future.

Power Amplifier

This is related to 'Power Amplifier for FM Transmitter' circuit published in November 2014 issue. Can it be used to amplify the available mobile-network signal? If not, how can it be done using another device?

Praveen Reddy Gorla
Hyderabad

The author Joy Mukherji replies:

The existing mobile signal can be amplified with the help of GSM 900MHz repeater/booster and an outdoor directional Yagi antenna. These are widely available on eBay from China.
