

indicated by a rectangular box or frame around the object as shown in Fig. 9.

6. Similarly, click GREEN and the green-colour object will be detected as shown in Fig. 10.

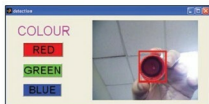

Fig. 9: Red-colour object being detected by the program

7. Click BLUE and the blue-colour object will be detected as shown in Fig. 11.

Note. After clicking on one colour, you have to wait for a few seconds till the camera stops detecting object frames. Then, press another colour

EFY Note

The source code of this project is included in this month's EFY DVD and is also available for free download at source.efymag.com

for detection. Otherwise, it will show an error.

You can change the duration by changing the value in the source code as shown below.

```
while (vid.FramesAcquired<=200)
```

In the code, we used 200 frames, but you can change this value as per your requirement. ●

Vivek Panchabhairya is B.Tech in electronics and communication from SRCEM, Gwalior
