

Accelerating Audio

PIC32 Flexible Audio Solutions

Streaming Audio Solutions for Apple® MFI, Android™ Devices and more!

Audio is everywhere and Microchip has the solutions you need to enable both Bluetooth® and USB audio playback. Multiple development platforms are available enabling a wide range of applications from educational devices to high-end audio docks.

Flexibility is everything! With a PIC32 MCU-based solution, you can tailor your hardware and software to exactly what you need. A palette of code modules, including SBC, MP3 and AAC decoders are available, as well as optional libraries for graphics, equalizers, volume control and more.
